UG PROJECT (Survey based)

Survey based UG project is an initiative undertaken by VESCOP for past two years. This UG project is given to students of First Year B.Pharm.

under this activity, survey questionnaire encompassing various environmental aspects is designed by activity co-ordinators. Target area to undertake the designed survey is also selected by activity co-ordinators. Each student of F.Y.B.Pharm has to take the survey by asking enlisted questions to the target population (Minimum 10 people). Survey is analysed based on the answers given by target population and a report is generated.

This survey based activity serves as the basis for one of the methods of literature survey which will help to inculcate research perspective in students. Being a preliminary step towards research based project, the activity is suitable for students of F.Y.B.Pharm under which students will learn to communicate the objective and scope of survey to participants. Students will also learn to achieve the assigned number of target participants and resolve the queries raised by survey participants. At the end of the activity, students will become more aware towards concerns regarding environmental issues and will be encouraged to take steps towards resolving the same.

The findings of the survey are directly correlated to one of the weekly mapping POs.

REPORT ON UG PROJECT (Survey based)

F.Y.B.Pharm (Div A and Div B)

Following are the conclusions drawn based on the surveys taken by students:

1. 36.7 % people think that their surrounding is clean.

2. 61.7% people are not satisfied by the garbage disposal system in their surrounding

3. 43.8% people feel that the garbage collection frequency in their area is at par

4. Only 42.2% people are aware about the diseases spread by the unhygienic conditions

5. 61.7% people agree that they are not very involved when it comes to keeping their surroundings clean.

REPORT ON UG PROJECT (Survey based)

Following are the conclusions drawn based on the surveys taken by students:

1. 31.4% people feel that they do not receive adequate water supply

2. 72.7% people are unhappy with the quality of the drinking water they receive

3. Only around 25.1% people are aware about the diseases spread due to unclean water

4. 73.6% individuals are unaware about how stagnant water leads to diseases such as dengue and malaria

5. Only 19.8% people think that they gave the provision for rain water harvesting in their society.

ACADEMIC YEAR 2018-19

JOURNAL CLUB ACTIVITY

It is an initiative that has been undertaken at VESCOP since last five years. This year VESCOP embarks its journey to the 5th batch of JCA activity which has been conducted for undergraduates students perusing studies in T.Y.B.Pharm Program as per the schedule. These marks are directly correlated to one of the activity based system in NBA thus creating its importance and attainment of the course curriculum and program by review and research aspect.

JCA is an activity whereby the class is divided into groups of four students each and is allowed to choose any topic they want in guidance of the mentor. They are asked to undergo a literature survey by referring to reputed International and Indian journals and present their power point presentation to the class. Evaluators in the form of teachers apart from the guide are allotted and are attending this session for judging their technical knowledge, presentation skills, and team spirit. This is followed by a brainstorming Question Answer session where in refining their communication skills and in depth knowledge is assessed. The theme is to think, find execute, learn. This activity attempts to shower light on how certain objectives that VESCOP wants to attain and inculcate in its undergraduate students can be achieved via

Dr. [illegible] E. Siddhaye

College of Pharmacy
HAMC, Deonar Collector Colony,
Chembur, Mumbai - 400 074

research and review aspect. This activity has helped students on how to conduct a meaningful review of the current research and ways to refer high index factor research papers in reputed journals. In this era when such activities with many novel techniques are known, making a student refer to such reputed journals helps them in figuring out the rationale and intellectual capability. This also boosts their thinking ability and builds interest in the subject of research area. All students submit a summary of the conducted activity after each session. The students, who aspire to be scientists, can carry out a meaningful research work later with an unambiguous aim by performing a proper literature survey from esteemed journals. The activity is headed **Dr.Gaurav Doshi** under the able guidance of **Dr. Supriya Shidhaye.**

JOURNAL CLUB ACTIVITY (2017-18)

It is an initiative that has been undertaken at VESCOP since last four years. This year VESCOP embarks its journey to the Fourth JCA activity which is conducted for undergraduates while they are in third year of bachelors in pharmacy program as per the schedule. These marks are directly correlated to one of the activity based system in NBA thus creating its importance and attainment of the course curriculum and program by review and research aspect.

JCA is an activity whereby the class is divided into groups of four students each and is allowed to choose any topic they want in guidance of the mentor. They are asked to undergo a literature survey by referring to reputed International and Indian journals and present their power point presentation to the class. Evaluators in the form of teachers apart from the guide are allotted and are attending this session for judging their technical knowledge, presentation skills, and team spirit. This is followed by a brainstorming Question Answer session where in refining their communication skills and in depth knowledge is assessed. The theme is to think, find execute, learn. This activity attempts to shower light on how certain objectives that VESCOP wants to attain and inculcate in its undergraduate students can be achieved via research and review aspect. This activity has helped students on how to conduct a meaningful review of the current research and ways to refer high index factor research papers in reputed journals. In this era when such activities with many novel techniques are known, making a student refer to such reputed journals helps them in figuring out the rationale and intellectual capability. This also boosts their thinking ability and builds interest in the subject of research area. All students submit a summary of the conducted activity after each session. The students, who aspire to be scientists, can carry out a meaningful research work later with an unambiguous aim by performing a proper literature survey from esteemed journals. The activity is headed **Dr.Gaurav Doshi** under the able guidance of **Dr. Supriya Shidhaye**.

To,

Head,

Media Relation and Public Awareness Section,

Bhabha Atomic Research Centre (BARC), Mumbai, India.

Dear Sir/ Madam,

We hereby express our sincere gratitude for giving our S Y B Pharm Students opportunity to visit BARC on Tuesday, 14th Feb 2017.

It was indeed a very good learning experience for our students. This visit will certainly assist students in correlating the theoretical aspects with the industrial applications.

We once again thank you and look forward for a long term association with your organization for such activities.

With Warm Regards,

Mr. Ojaskumar B. Agrawal (Assistant Professor)
S.Y.B.Pharm Class Coordinator

Fwd: BARC Visit

mrpas@barc.gov.in <mrpas@barc.gov.in>
To: ojaskumar.agrawal@ves.ac.in

16 January 2017 at 14:45

Dear Sir,

This has reference to your College visit to BARC confirmed for 14th February, 2017.

Attached along with are documents that have to be typed on the College letterhead and duly signed by the Principal. Faculties accompanying the students have to give their names and telephone numbers (faculty members) on a different letterhead with their signatures and approved by Principal.

Please ensure that all students and faculty members carry their valid ID cards without which entry will not be granted for the visit.

Kindly, scan all the documents in JPEG format and be sent along with your mail. Hard-copies need to be couriered on the following address:

Shri R.K. Singh
Head, Media Relations & Public Awareness Section
(SIRD),
Bhabha Atomic Research Centre
Central Complex,
Mumbai 400 085.

Please also confirm if working lunch has to be provided to the students and faculty members. Please treat this as very urgent since approvals have to be taken beforehand for this trip.

Thanking you,

Yours sincerely

(Prabha Pednekar)

The Bhabha Atomic Research Centre (BARC)

The Bhabha Atomic Research Centre (BARC) located in Trombay, Mumbai, is India's leading nuclear research center. On 14th February, 2017, the students of Second Year B.Pharm, of VES College of Pharmacy, had the opportunity and privilege to visit BARC.

The day started off with a virtual tour of BARC once the students got there, through a short film about the whole place, its history, all the different facilities present and the various departments of the unit. With the short film, students were briefed about the nuclear reactors like Apsara, Cirus and Dhruva, the largest being Dhruva, the food technology unit that involves food processing by irradiation, and finally the robotics unit, including automated material transporters, various manipulators and snake arm robots.

'THE DHRUVA'- RESEARCH REACTOR

The Dhruva reactor is India's largest nuclear reactor located in the Bhabha Atomic Research centre at Trombay, in Mumbai. It is India's primary generator of weapons- grade plutonium- bearing spent fuel for its nuclear weapon program.

Dhruva was designed, developed, constructed and commissioned by Indian scientists and engineers exclusively by making use of indigenous technical knowhow. The Dhruva project costed 95 million rupees. It basically uses heavy water as a coolant and a moderator and by varying it's level, one can moderate the power output. Dhruva uses metallic uranium fuel and heavy water as moderator and coolant. The main reactor vessel is made of stainless steel with 146 positions available for the fuel rods, cadmium shut off rods, isotope irradiation facilities and experimental loops. The reactor vessel is housed inside a water filled stainless steel lined concrete vault. The reactor building consists of the service building wherein the fueling machine discharges the fuel, and the spent fuel storage building (SFSB) wherein the fuel is stored and processed into the inventory water. This research reactor is one of the prime highlights of this research centre.

Dhruva reactor is widely used in neutron beam research studies involving material science and nuclear fission processes. Dhruva has been extensively used for basic and applied research in the frontier areas of science and technology, and radioisotope production. Besides utilization of regular

irradiation facilities for these purposes, some of the fuel and other in-core positions have also been used for carrying out certain specific engineering experiments.

FOOD TECHNOLOGY AND FOOD PROCESSING DIVISION

After seeing the Dhruva plant and gaining insight on its working and the various components and processes involved in it, the students then moved on to the food technology division. Preservation of food has become increasingly important, especially in a tropical country like ours, where temperature, cost of production, transportation, spoilage and many other factors play an important role. Thus, the food technology and processing division at BARC aims at increasing the shelf life of food items such as pulses, grains, vegetables and meat products with the help of radiation. Radiation processing of food involves exposure of food to short wave radiation energy to achieve a specific purpose such as extension of shelf-life, insect disinfestation and elimination of food borne pathogens and parasites. In comparison with heat or chemical treatment, irradiation is considered a more effective and efficient technology to destroy foodborne pathogens.

The mandates of food processing followed at BARC are

1) Food safety;

2) Food security ; and

3) International trade.

The sources of ionising radiations used for the irradiation process of food include:

1) Radioisotopes:

- Cobalt-60
- Caesium-137

2) Machine:

- Electron beam
- X - rays

Cobalt-60 is most widely used as it is very easy to control. X - rays are not usually used as they are expensive and not viable.

On the basis of radiation dose, applications of radiation can be classified into:

1) Low Dose Applications:

- Sprout inhibition in bulbs and tubers (0.03 - 0.15 kGy)
- Delay of fruit ripening (0.25 - 0.75 kGy)
- Insect disinfestation including quarantine treatment and elimination of food borne parasites (0.25 - 1 kGy)

2) Medium Dose Applications:

- Reduction of spoilage microbes to improve shelf-life of meat, poultry and seafoods under refrigeration (1.5 - 3 kGy)
- Elimination of pathogenic microbes in fresh and frozen meat, poultry and seafoods (3 - 7 kGy)
- Reducing number of microorganisms in spices to improve hygienic quality (10 kGy)

3) High Dose Applications:

- Sterilization of packaged meat, poultry and their products which are shelf-stable without refrigeration (25 - 70 kGy)
- Sterilization of hospital diets (25 - 70 kGy)

Unit of measurement of radiation: gray (Gy) where,
1 Gy = 1 J/kg

PROCESS OF IRRADIATION:

Radiation processing of food is carried out inside an irradiation chamber shielded by 1.5 - 1.8 m thick concrete walls. Food is placed in suitable containers (eg. Aluminium containers) and sent into the irradiation chamber with the help of an automatic conveyor. The conveyor goes through a concrete wall labyrinth, which prevents radiation from reaching the work area and operator room. When the facility is not in use the radiation source is stored under 20 ft deep water. The water shield does not allow radiation to escape into the irradiation chamber, thus permitting free access to personnel to carry out plant maintenance. For treating food, the source is brought to the irradiation position above the water level after activation of all safety devices. The goods in aluminium carriers or tote boxes are mechanically positioned around the source rack and are turned round their own axis, so that contents are irradiated on both the sides. The absorbed dose is determined by the residence time of the carrier or tote box in irradiation position. Absorbed dose is checked by placing dosimeters at various positions in the carrier.

ADVANTAGES OF IRRADIATION:

1) Longer shelf-life for food.

2) Cold process.

3) No chemical residues left in food.

4) Preservation of natural flavour and aroma of food.

5) Increase in international food trade.

The irradiation procedure in the Food Technology and Food Processing division of BARC is recognised world over and approved by international organisations like World Health Organisation (WHO), International Atomic Energy Agency (IAEA), Food and Agriculture Organisation (FAO) and World Trade Organisation (WTO).

DEPARTMENT OF REMOTE HANDLING AND ROBOTICS:

A visit to the division of remote handling and robotics was organized too which provided an insight into the various instruments that function in order to carry out the most basic activities with great efficiency and safety in BARC.

Remote handling plays a vital role in all nuclear installations. In such facilities, the operators can handle the material only behind thick shields, using remote handling tools. The tools are expected to carry out varied tasks inside the hot cells. The Master Slave Manipulators (MSM's) are the most dexterous and widely used general purpose handling tool in the nuclear industry.

A typical MSM consists of a Slave arm in the active area of the hot cell and a Master arm, that controls the slave arm, in the operating area of the hot cell. The motions imparted by the operator are replicated by the slave arm in order to carry out the desired tasks.

Various other instruments in this section of the research centre showed a clear picture of the improvised technology used to assure safety while handling the radioactive elements. These include-

1. Automated guiding vehicle which is a raw material transport vehicle.
2. Wireless tele operated Robot involved in the disposal of the explosives.
3. Mobile robot for radiation profiling
4. Parallel manipulator
5. Robot for stacking of pellets.

One of the recent experiments related to the remote handling includes the use of parallel manipulator for brain surgery. These instruments possess innumerable applications in the field of medicine.

The Bhabatron-II and simulator in BARC play a vital role in diagnostic procedures related to the radioactive metals. Also, an HDR source assembly is used as a treatment methodology for brachytherapy.

THE SUPERCOMPUTER

The Anupam Aganya supercomputer series is designed by the Bhabha Atomic Research center for their internal usages involving scientific studies. It can perform 110x1012 calculations per second. It is mainly used for molecular dynamical simulations, reactor physics, theoretical physics, computational chemistry, computational fluid dynamics, and finite element analysis.

This Industrial visit to one of the most renowned research Centre in the world and India's premiere nuclear research facility was a great opportunity to learn and explore. For future aspiring pharmacists like us, it indeed was a brilliant experience.

Head: Solid State Chemistry Section, Chemistry Division,

Bhabha Atomic Research Centre (BARC), Mumbai, India

Professor of Chemistry,

Homi Bhabha National Institute (HBNI), Mumbai, India

Respected Sir,

As a part of curriculum our students are expected to visit a Research Institute. This year our students are very eager to visit your esteemed Institute. The purpose of visiting is to give an opportunity to broaden their learning beyond the syllabus with respect to aspects such as research facilities, material managements, quality control system, research and development activities etc. Likewise, this will assist in correlating theoretical concepts with the industrial applications.

I wish to conduct this visit for our Second Year B. Pharm. students. I request you to grant permission for the same. Any schedule as per your convenience will be tried best to accommodate. My class strength is about 66 and the class would be accompanied by two faculty members. Kindly let me know if you can permit us to visit your research centre

Thanking You,

Rules & Regulations while entering BARC

1. Valid College Photo Identity Card for students and faculty is mandatory
2. Mobile phone, charger, headphone, SIM Card, Memory Card etc. are not allowed to carry inside BARC for anybody.
3. Electrical and Electronic gadgets like CD, floppy, pen drive, camera etc. and even cosmetic items are not allowed to carry inside BARC.
4. All the students and staff shall be Indian.
5. No foreign students and faculty are allowed to visit BARC
6. Neither new names will be added nor interchange is possible on the day of the visit.
7. Students shall carry pen, blank writing pad and identity card while entering the BARC premises. Strictly No bag baggages, hand bags, ladies purse etc.
8. All the students and staff should report at BARC North Gate Reception by 9.30 a.m
9. Discipline shall be maintained in the BARC premises.
10. The staff shall take the responsibility of all the students. If students do not carry photo identity card and/or is caught with any electronic gadgets/electrical/cosmetic items and/or any indiscipline behavior the college authorities shall take necessary action against the student and responsible faculty member.

Subject: Permission to arrange Blood Bank visit by our students and staff

Respected Sir / Madam,

As a part of curriculum our students are expected to visit an industry / Blood Bank / Hospital. This year our students are very eager to visit your Blood Bank. The purpose of visiting is to give an opportunity to broaden their learning beyond the syllabus with respect to aspects such as Storage of Blood, separation of different components of blood, blood bank design, quality control system etc. Likewise, this will assist in correlating theoretical concepts with the industrial applications.

We want to conduct this visit for our Second Year B. Pharm. students. We request you to grant permission to visit your organization. Any schedule as per your convenience will be tried best to accommodate. Our class strength is about 60 and the class would be accompanied by two faculty members. Kindly let us know if you can permit us to visit your factory premises.

Thanking You,
With kind regards,

BLOOD BANK VISIT

Wamanrao Oka Blood Bank, Thane (W)

A visit to the *Wamanrao Oka Blood Bank*, Thane(W) was conducted for the students of S.Y B. Pharm of Vivekananda Education Society College of Pharmacy on Thursday, 12/04/18

The blood bank is a four storeyed dedicated building for the collection, storage and processing of blood and blood products.

A batch of 30 students attended the visit. The teachers in charge were Mr. Ojas Agarwal and Dr. Swati Mittal. The reporting time was 10:45 am

Initially the batch was divided into 2 groups of 15 students each. One group was guided by Dr. Umesh and the other by Dr. Subhash.

Initially we were shown the Counseling Room and the Reception area, both located on the ground floor of the building. Here, an elaborate history is obtained about the donor to ensure that he/she is devoid of any life-long ailments. The people with following diseases are deemed unfit for donating blood

- Cancer
- Diabetic
- Suffered jaundice 3 yrs earlier or sooner
- Viral diseases

Also, the prime motto of this is to keep in mind *"Donor Safety" along with "Patient Safety"*

Next we moved on to the first floor where we headed towards the Donor Selection room. Here, the blood Hemoglobin levels and the Blood group.

Hemoglobin levels are tested by measuring the time required by the blood drop to sink in a $CuSO_4$ solution. The blood group is found out by using the antisera liquids

A student, Mr Kishan, volunteered to have these blood tests performed on.

The following information was provided about this preliminary test-

Hemoglobin levels must be 12. 5g/dLor more.

A patient receives blood from a donor of the same Blood group. Only in cases of emergencies, blood grouped O-ve is used.

Next we moved on to the Medical examination room where the vitals of the donor are recorded.

This includes

- Donor blood pressure
- Lung capacity
- Pulse
- Body temperature
- Edema or swelling of hands and legs
- Enlargement of spleen or liver

Age requirement: the age limit starting from completion of 18 years of age and extending upto completion of 65 years of age

Only if these vitals match the required standards, the person can donate blood.

Next we saw the area where the blood is actually collected.

Here there is a special bed for the donor to lie down. Optimum three-fold sterilization is provided by using Spirit, Savlon, and Betadine solutions to prevent sepsis or infection to the donor. The anti-cubal fossa is identified and the blood is collected in special bags. There are three types of collecting bags available for

- Whole blood
- Double(for plasma and RBCs)
- Triple(for platelets)

Next we were guided to the Apheresis room. Here the Platelet component of the blood is exclusively separated. The withdrawn blood is centrifuged using a centrifuge machine and the platelets are collected, the rest of the components are recirculated in the donor's body. This single cycle takes about 10 mins and is carried out till upto 350 ml volume worth of platelets are collected.

Platelets are administered to patients suffering from diseases like Dengue, Malaria, Cancer,etc. The Platelet count of the donor should be above 2 lakhs per mL of blood volume.

Transfusion of platelets is carried out when Platelet count of patient drops below 20,000 per mL.

After the blood collection is completed the donor is taken to the refreshment room and the blood collected is propagated to the storage areas via the special lift to avoid manual handling. Two test tubes of blood sample are taken and tested for the following conditions

- HIV 1&2
- Hepatitis B
- Hepatitis C
- V.D.R
- Malaria
- Irregular antibodies

Only if all the afored mentioned tests are negative, the donated blood can be used for transfusion else it is discarded via the process of incineration.

Also, a cross matching test is performed where the donor serum and PCV are cross matched with those of the patient. If no agglutination occurs, transfusion can be successfully carried out.

Next we headed to the storage_area where different refrigerators maintained at different temperature conditions were used for different blood products.

- RBCs(2-6°C for 35 days)
- Plasma(-40 to -60°C for 1 year)
- Platelets(20-24°C for 5 days)

Next we saw the different centrifuge machines used for separating the blood components.

The heavy duty cooling centrifuge operates within 1000-3000 r.p.m and is useful in separating the components and also cooling the contents of the bag.

The plasma, platelets and RBCs are separated from the bags using the Plasma expresser machine. For this purpose the different bags intended for different use are utilized.

Scanned by CamScanner

The separated components are then stored. They are transported to the hospitals as and when required on completion of proper documentation. This concluded the trip around the building and the two groups assembled together in a room where refreshments were served.
Overall it was observed that high care was taken to maintain the aseptic conditions of the blood products to avoid contamination.

The two co-ordinators_Dr. Umesh and Dr. Subhash gave us some additional information about the processing of the blood products and also about how their financing is carried about. They stressed on how donating blood is a voluntary choice and not a compulsion and that the practice of professional donors is now obsolete. This was followed by answering the questions of the students pertaining to the information they acquired throughout the visit. The session ended on a positive note encouraging the donation of blood. Few students also volunteered to donate blood.
The entire blood bank visit was an enthralling novel experience and also enhanced our practical knowledge.

Dear Sir/ Madam,

With reference to the recent Blood Bank visit of our Second Year B. Pharm students to your organization, I hereby express my gratitude to you for organizing the same.

It was a very good learning experience for our students. This visit will assist in correlating the theoretical aspects with the industrial applications.

I once again thank you and look forward for a long term association with your organization for such activities.

With kind regards,

Mr. Ojaskumar D. Agrawal | Asst. Prof. | VESCOP | _____

Activity Report – Blood Bank Visit

Organising Institute: VES College of Pharmacy, Mumbai

Class: SYBPharm SEM IV

Co-ordinator of Activity

Mr. Ojaskumar D. Agrawal | VES College of Pharmacy, Mumbai -400 074

Details of the Activity

Sr.No	Activity	Timing	Date	Location
1	Visit to Blood bank	10:00am	10th and 11th April, 2019	Wamanrao Oka Raktapedhi, Ghantali Devi road, Naupada ,Thane West, Thane 400602

Description of the activity:

Our Blood Bank visit to Wamanrao Oka Raktapedhi,Thane was accompanied by Mr.Ojaskumar Agrawal Sir and Mrs. Sonali Munj Ma'am on 10th April and on 11th April the teachers incharge were Mr. Pratip Chaskar Sir and Ms. Karunavati Nabar Ma'am .

The blood bank was a 5 storey tall building beginning with the councelling room on the ground floor ,where the form consisting of donor details were asked to be filled .This required information such as Donor name ,age ,medical history (any ongoing medication ,illness ,sleep cycle ,any surgery major /minor), donation history ,etc.

The donor is then taken to the administration room on the first floor where he/she is asked to check for their Hb count by using copper sulphate solution and it is required to be more than 12.5 units .Also the blood group of the donor is determined here .Adjacent to the administration room is the medical examination room where the BP of the donor is checked ,also the donor is checked for any heart related disease such as arrhythmia .Next to it is the room for blood collection – this procedure involves the following steps :

1) Proper vein selection

2) Drying the area with spirit – betadine –savlone –spirit

3) Injecting the syringe and collection of blood .There are 2 types of bags used for blood collection (350-450 ml)–single bag which is used to collect WHB (whole human blood) and double bag is used to collect WHB and RBCs (2-6 degrees for 35 days), freshly frozen plasma (-35 degree for 1yr)and platelets (20-24 degree for 5 days with constant agitation).The bag consists of CPD solution(citric acid ,sodium phosphate and dextrose) as anticoagulant .A sealing machine was used to seal the blood bag and there were 2 types off test tubes, the large one with CPD solution and smaller one without CPD solution which is taken for further testing . The blood collection room also had a separate room for Apheresis (platelet collection 250-300 mm). After donation the donor is provided with refreshments which include coffee and glucose biscuit. Towards the exit of the floor was a dumb waiter lift for the movement of blood bags and test tubes to the different floors.

The second floor has the red cell serology room –cross matching of the donor and receiver blood is done here with major and minor testing ,this process takes about 45mins-1hr.Next to it is the TTD testing room ,here tests for HIV 1 and 2 ,Hepatitis B and C ,malaria and VDRL (test for syphilis) is done .Thermographs are used to store the blood bags(2-6 degree) and this room also has a reagent refrigerator. Hot and cold antibodies are stored at a temperature greater than 37 degree and room temperature respectively.

The 3rd floor had room for the quarantine storage having the ultra low freezer to store the untested blood .Opposite to it is the component storage room it includes instruments such as platelet incubator and agitator, plasma freezer and RBC storage .The component preparation room has instruments such as Laminar air flow which has the plasma expresser, centrifugation machine used to separate RBC, WBC, platelet and serum and Cryo bath. In the centrifugation machine platelet is centrifuged at 22 degrees and other components at 4 degrees.

At the end of the tour we settled in a discussion room on the 4th floor where we were given theorical information about blood donation also we were made aware of Bombay blood group .It is the rarest blood group. First found in Bombay (Mumbai) in India, hence called Bombay blood group. It is observed to occur in 1 out of every

250,000 people except in parts of India where the incidence has been observed to be as much as 1 in every 7,600. It is also called the HH group. The peculiarity is that they do not express the H antigen. As a result they cannot form A antigens or B antigens on their red blood cells. Thus they can donate blood to anybody with ABO grouping but can receive blood only from Bombay blood group people. The visit ended with us enlightened with theoretical and practical information about blood donation.

IMPACT ANALYSIS FOR BLOOD BANK VISIT

Academic Year: **Date:**

Title of the activity:

A. Objectives:

1. To provide students an insight regarding working module of Pharmaceutical Industry/ Hospital/ research facility
2. To bridge the gap between theoretical training and actual industry practices.
3. To develop interest among Students/Learners towards usage of Modern tools, sophisticated equipment and to create Professional Identity

B. Activity Outcomes:

	Upon completion of this activity learners would:	Mapped PO	Level of Mapping
AO 1.	Be able to recognize the various working units of pharmaceutical industry / Hospital/ research facility	1, 11	3
AO 2.	Be able to recognize different steps and processes involved in industrial operations.	1, 11	3
		4	2
AO 3.	Become more aware of industry practices and regulation as well as importance of documentation.	1	3
		4	3
AO 4.	Be able to better identify their prospective areas of work in overall organization function.	1	3
		2	3
		7	3
		8	2
		10	3

IMPACT ANALYSIS FOR BLOOD BANK VISIT

D. Rate the outcome: Industry visits helped you to

Q-No.	Question	AO mapped
1.	Observe the various working units of pharmaceutical industry / Hospital/ Research Facility	AO1
2.	Understand the different steps and processes involved in industrial/Hospital/Research facilities operations.	AO2
3.	Comprehend the type and scale of the machinery used at large scale manufacturing level/ high end equipments and instruments used at various facilities.	AO3
4.	Relate the theory learned in the course to its application in the industry.	AO1, AO2, AO3
5.	Be aware about professional practices and importance of planning, ethics and regulations in Pharmaceutical Industry.	AO4
6.	Learn about professional opportunities available in industry/Hospital/ Research Facility.	AO4

Please rate using the following key-

3: Strongly agree **2: Agree** **1: Disagree**

Details of activity:

Name of the Activity	**Visit to ACTREC**		
Day, Date	Thursday 28/11/2019	**Department/ Committee/Faculty**	
Venue		**Time**	
Nature of activity	Field work	**Total no. of participants**	14

Activity Information:

Objectives	1.Visit to a research organization 2. to understand the research process
Outcomes	The activity correlated in courses Pharmaceutics, Medicinal Chemistry and Pharmacology Students were be able to 1. Understand the functioning of a research centre 2. See research demonstrations 3. Learn the concept of scientific data and data analysis 4. Visualize the application of theoretical knowledge and helped in experiential learning about radio pharmaceuticals and cancer research

Dear Madam,

I hereby confirm the participation from VES college of Pharmacy for the ACTREC open day on 28th November. However, due to some other professional commitments, I, Miss Chaitali Surve, Assistant Professor, VES College of Pharmacy will not be accompanying the students as faculty in-charge. Instead of me, Dr Anand Chintakrindi (marked in cc), Assistant Professor, VES College of Pharmacy will be accompanying the students as faculty in-charge.

Kindly note the same.

ACTREC's Open Day 2019: Thursday 28th and Friday 29th November 2019

Dear HOD/ Faculty,
Thank you for your interest in participating in ACTREC's Open Day 2019. We are pleased to include your College in the schedule of visits.

Details of your College's visit to ACTREC

Batch B: Thu. 28th November 2019, Afternoon Session (**Reach ACTREC by 1.30 pm**; the visit will end by 4.45 pm)

B1	Oriental College of Pharmacy	Pharmacology (15)
B2	Sathaye College	Microbiology (15)
B3	VIVA College	Biotechnology (15)
B4	MD College	Zoology (15)
B5	Wilson College	Microbiology (15)
B6	Ilaria Medical College	Biochemistry (16)
B7	VES College of Pharmacy	Pharmaceutics (15)
B8	KN Kisalva College	Biotechnology (15)

Dr. (Mrs.) Supriya S. Shidhaye
PRINCIPAL
Vivekanand Education Society's
College of Pharmacy
HAMC, Behind Collector Colony,
Chembur, Mumbai - 400 074.

- Transport: NMMT bus no. 52 or 55 from Belapur rly stn or bus no. 54 from Kharghar rly stn (frequency ~10 min) come to our campus (map and directions attached) - ask for the "Tata Hospital" stop. Bus travel time to our campus from Belapur station is around 22 minutes and from Kharghar station is around 15 minutes. Therefore do ensure that you reach either station well in time to reach our campus.
- Entry into ACTREC: Please enter the ACTREC campus together as a group, wearing your college identity cards. Carry a printout of this email. Proceed directly to the Poster display in the entrance foyer of Khanolkar Shodhika.
- Refreshments: Students and faculty are advised to carry drinking water with them. Refreshments will be available on payment basis at the Visitors Canteen (open door outside Paymaster Shodhika).

Details about the Open Day 2019 lab demonstrations will be uploaded on the ACTREC website shortly. The link is: https://actrec.gov.in/OpenDay2019.html

Please confirm about your visit and participation by replying to this email. For any clarifications, please revert back. In case you plan to cancel your visit for any reasons, please intimate us immediately to accommodate other colleges which are on wait list.

Subject: Permission to arrange a factory visit for our students and staff

Respected Sir/ Madam,

As part of educational tour to industry our students are very eager to visit your factory. The purpose of visiting the factory is to give an opportunity to broaden their learning beyond their syllabus with respect to aspect such as factory design, manufacturing processes, material management, quality control, packaging, etc. Likewise this will assist in correlating the theoretical aspects with the industrial applications.

We want to conduct this visit for our first year B. Pharm students. We request to grant permission for the same. We would be obliged to have a visit preferably on 13th march 2020. Our class strength is about 50 and the class would be accompanied by two faculty members.

Thanking you, with kind regards.

Dear Aparna

Please find here below the link to join the training on Thursday June 24 2021.

Request you to share it with your students and faculty. The names you are yet to share with please share latest by tomorrow.

Is your principal or senior going to join us then please share the names and designation with me for my welcome address

Best regards

Leena

Subject: Webinar on "Insights in ACG Technology" for the VES College of Pharmacy on Thursday June 24 2021 on Zoom

Dear Delegate,

Greeting from ACG I

We thank you for having registered for Webinar on "Insights in ACG Technology" for the VES College of Pharmacy on Thursday, June 24, 2021 between 11 am to 6 pm.

As the meeting is on Zoom, please find the Meeting invite.

Topic: Insights in ACG Technology

Time: Jun 24, 2021 11:00 AM India

Join Zoom Meeting

https://zoom.us/j/93209628748?pwd=VUfTS1dSSDJoMnSYa0tMTjdTWVU3QT09

Meeting ID: 932 0962 8748

Passcode: 612095

Dr. (Mrs.) [illegible] S. Shidhaye

REPORT

ON

INDUSTRIAL VISIT

TO

ACG

ACG

PHARMA MANUFACTURING SOLUTIONS COMPANY

AT VES COLLEGE OF PHARMACY,CHEMBUR

ON

24TH JUNE 2021

V.E.S.

Since 1962

For Circulation VES COLLEGE ONLY

Dr. (Mrs.) [illegible] S. Shidhaya
Principal,
Vivekanand Education Society's
College of Pharmacy
HAMC, Behind Collector Colony,
Chembur, Mumbai - 400 074.

TABLE OF CONTENTS

Introduction to ACG:- 3
Pin Bar Design 4
Manufacturing of empty hard capsules:- 5
Technology In Capsule Manufacturing: A Journey 8
Track and Trace Requirements for Pharmaceutical Industry 10
Inspection product portfolio 16
ACG Important Equipment's 18
Overview Of Packaging Films and Foils 22
Industry Internet of Things- ACG's Roadmap into the future: 26

Introduction to ACG:-

ACG started in the year of 1964 at Kandivali (Mumbai, India). Today, ACG is the second largest capsule manufacturing company and one of the world's largest solid dosage form equipment manufacturing companies. Mr Ajit Singh is the chairman of ACG, and Mr Jasjit Singh is the Co-chairman of ACG. Subsequently, the company expanded to other countries and diversified into related businesses in the pharmaceutical sector. These include equipment manufacturing, packaging, inspection, testing, research and development. ACG provides empty hard pharmaceutical capsules, encapsulation machinery, tablet coating systems, tablet compression systems, fluid bed equipment, tablet tooling and performance enhancers, along with online and inline analytical and inspection systems. The company also provides blister packing, high barrier packaging films, carton packing machines, camera inspection systems, candy-wrapping machines and end-of-line case packers.ACG has about 4,500 employees and is one of the leading manufacturers of empty hard-shell capsules. The ACG group offers manufacturing, packaging, research and development services for the pharmaceutical industry. ACG is present in 15 countries, with six manufacturing locations, and it is serving more than 100 countries. Various ACG capsule plants are located at Shirwal, Pithampur, Dahanu, Lukaps, Croatia. The ACG's student engagement program mainly include

- ACG plant visit
- Internships in ACG
- Scholarships and Awards
- Projects with colleges
- Museums
- Lecture series in colleges

Pin Bar Design

- Gelatin Pin bar
- HPMC Pin bar
- HPMC without gelling agent
- Liquid Filling
- Capsules For Clinical trials
- Sprinkle Capsules
- Capsules for tablet enrobing

Manufacturing of empty hard capsules:-

For Circulation in VES COPY ONLY
4

In process quality checks :-

While making capsules it's the important step to have quality checks

- Single wall thickness : It plays important role, usually have average of 100 micron shell thickness for all sizes of capsule.
- Outside diameter : The above parameter determines outside diameter which will be helpful to determine the capsule machine.
- Brittleness
- Dome thickness
- Cap and body length
- Closed joint length
- Moisture content analysis
  For gelatin capsule :13-16%
  For hpmc capsules : 3-8%
- Empty capsule weight: It has to be in specified limit.

Manufacturing defects in capsule:-

The defects physically categorized as

1) Critical defect-
   a) affects the performance of a capsule
   b) contributes to a major filling problem
2) Major defect
   a) May cause a problem on a filling machine
3) Minor defect
   a) No effect on performance of capsule
   b) Makes the capsule visually imperfect

Critical defects	Major defects	Minor defects
Holes	Loose pieces	Minor splits

Uncut cap/body	Double caps	Minor rough cuts
Cracked/split	Major rough cuts	Minor punched dome
Telescoped	Major punched dome	Bubbles
Mashed	Thin spots	Wrinkles
Trims	Short cap	Star ends
String on end	Long body/ cap	Specks

Evaluation of hard capsules:-

1. Identification tests
2. Moisture- loss on drying
3. Disintegration time
4. Average weight of capsule
5. Heavy metals
6. Microbial limit
7. Residual lubricant content

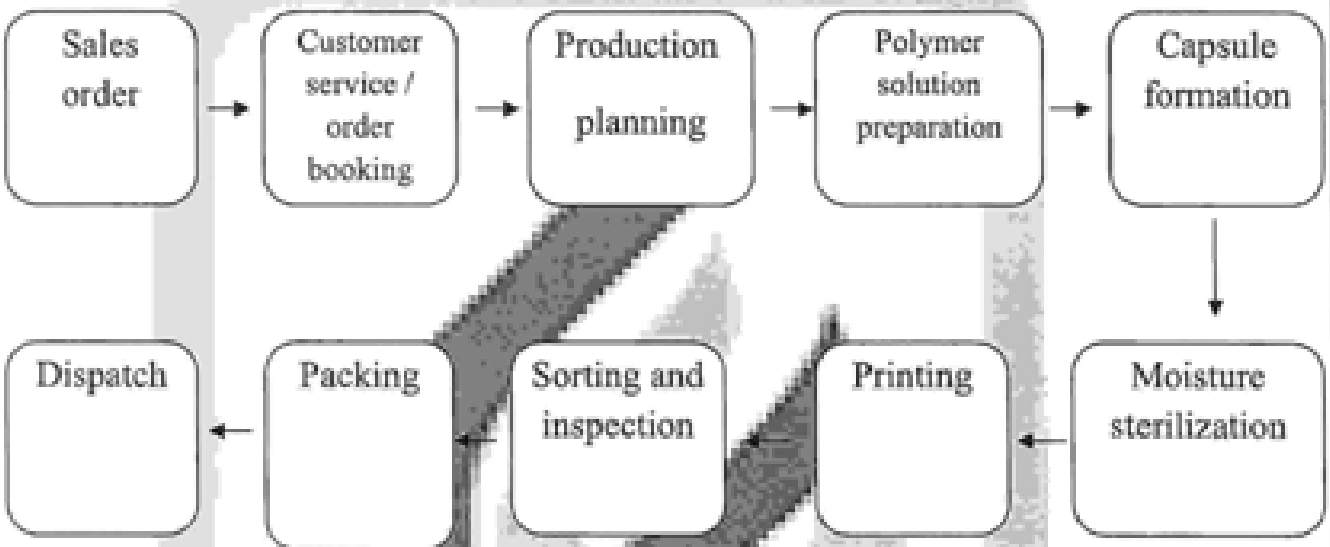
Capsule variants available:-

1. Gelatin capsules
2. Gelatin with plasticizer
3. Fish gelatin capsule
4. HPMC capsule
5. HPMC capsule without gelling agent
6. Delayed release capsule
7. Pullulan capsule
8. Tabsule - capsules for tablet enrobing
9. Pearlz capsules

Capsule product range:-

1) ACGcaps GR - regular gelatin capsules
2) ACGcaps GL - liquid fill gelatin capsules
3) ACGcaps GI- dry powder inhalation gelatin capsules
4) ACGcaps GC - gelatin capsules for clinical trials
5) ACGcaps GF - fish gelatin capsules
6) ACGcaps HR - regular HPMC capsules
7) ACGcaps H' - HPMC plus capsules
8) ACGcaps HD- delayed release HPMC capsules
9) ACGcaps HL - liquid fill HPMC capsules
10) ACGcaps HI- dry powder inhalation HPMC capsules

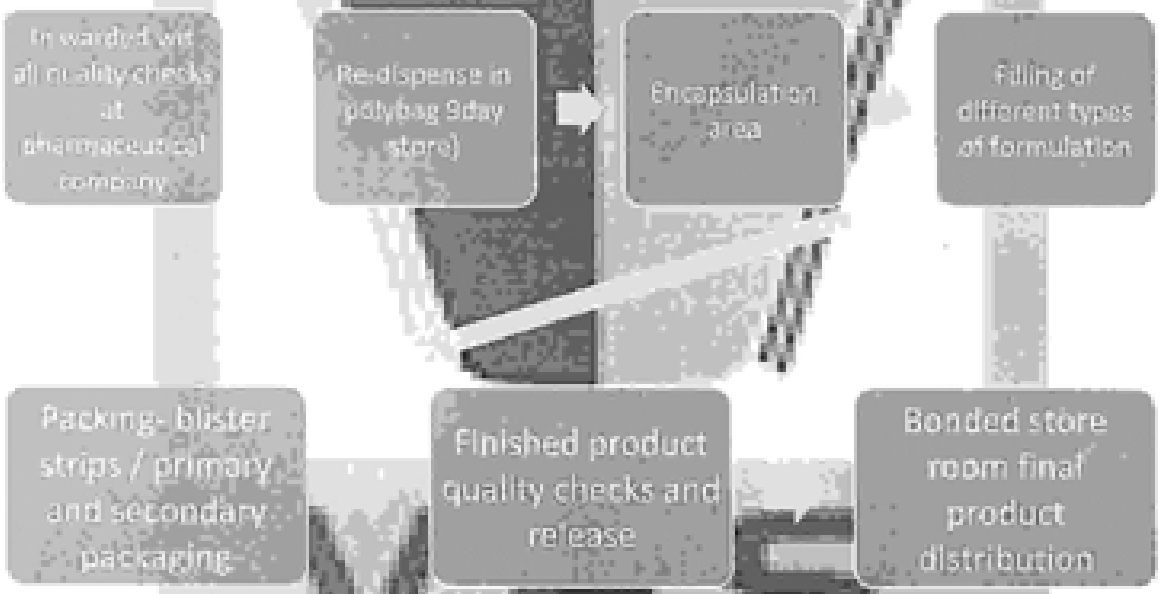
Process flow of development :-



PACKING :
Primary - food grade multi layer co-extruded poly bag
Secondary - corrugated cartons or may change depending upon the customer need.

STORAGE :
Temperature - 15 C TO 30 C (59F TO 86F)
Relative Humidity - 35% - 65%

Empty Capsule journey :-



V.E.S.
Since 1962

Technology In Capsule Manufacturing: A Journey

Presenters: Dr. Jnanadeva Bhatt and Anita Solanki

Dr. Bhatt mentioned about the history of Hard capsules dated from 1834- (one piece capsule) to 1989(two piece capsule) – A history of 170 years and continued further with the following points:

Materials of construction:

Polymer Characterization: Film forming property, tensile strength and thermal properties

Source: Animal (Gelatin) and Vegetarian (HPMC)

TYPE A	TYPE B
Acid Hydrolysis	Alkaline Hydrolysis
Procine skin	Bovine hide and bones

Critical Paremeters:

- Solution preparation
- Viscosity of solution
- Machines (Automatic and Semi automatic)
- Pin bars (Different for Gelatin and HPMC)
- Temperature
- Relative Humidity
- Drying cycle

PROCESS:

1. Solution preparation
2. Pin bars lubrication
3. Capsule moulding
4. Drying
5. Stripping / Cutting
6. Joining
7. Printing
8. Packing

(A video on manufacturing process was showcased)

IPQC:

a) Wall thickness/ dome thickness
b) Cap and body length
c) Closed joint length
d) Moisture analysis
e) Weight and analysis

Defects:

Critical : Holes , Cracked

Major : Loose pieces, Long body/ Cap

Minor: Wrinkles, Bubbles

Evaluation:

- Identification test
- LOD
- Disintegration time
- Average weight of Capsule
- Heavy metal
- Microbial Limit
- Residual lubricant content

Variants:

Fish gelatin Capsule

Pullulan Capsule

Pearlz Capsule

Tabsule (Capsule for tablet enrobing)

At the end he gave a summarized overview of manufacturing process and the Capsule shells available.

Miss Anita Solanki Maam gave an idea about new application and technology in Hard capsules.

Track and Trace Requirements for Pharmaceutical Industry

Definitions-

1) Track and Trace can be defined as the process of identifying, capturing and, sharing.

2) The product information to determine its current and past-

- Location(s), and
- Owner(s)

as the product is sold or transferred across the supply chain.

3) Using this Traceability information, the pharmaceutical product can be tracked forward throughout the supply chain and traced back in the supply chain from end-user(consumer) to Supplier or Manufacturer.

Need for Track and Trace and Global Science-

Overcome and Terminate the "Lucrative Cheap" Counterfeit market of Pharmaceutical Products

•'Counterfeiting or Fraud' increases to exist putting the patients safety at risk as well as drug manufacturer credibility loss in manufacturing and distribution of other pharmaceutical products in the market.

• Counterfeiting industry adopts practices such as-

1) low cost instruments or machines for manufacturing,

2) unhygienic and unwarranted health and safety quality standards

3) unauthorized distribution channels and many other illegitimate procedures.

Definition of Counterfeiting-

World Health Organization (WHO) definition of counterfeit medicines -

Product that is :

• deliberately and fraudulently mislabelled with respect to identity,

V.E.S.
Since 1962

composition and/ or source.

Counterfeiting of medicines can apply to both branded and generic products.

Counterfeit products may include products:

1. with the correct ingredients or
2. With the wrong ingredients, or
3. without active ingredients, or
4. with incorrect quantities of active ingredients, or
5. with fake packaging.

Global Fight against Counterfeiting:

Counterfeiters have already penetrated distribution of vaccines and cures or immunity boosters related to Coronavirus (COVID-19).

In March 2020, Europol published a warning, that there will be a rise in crime related to the COVID-19 pandemic.

Counterfeiters benefit from stoking people's fears of shortages and make profits and boost the counterfeit industry.

Counterfeit drugs are a serious threat to the public health and also cause economic losses for the pharmaceutical industry.

Track and Trace - Present and Future

• Turkey was the first country to implement a full pharmaceutical track and trace system throughout the entire regulated domestic supply chain.

• Pharmaceutical products are labelled with a Barcode containing unique Indian Aadhar Number or US Social Security number) Worldwide Government Authorities/Regulatory Bodies are defining the guidelines and recommendations for product traceability to-

1. authenticate products and
2. bring visibility to the movements of the products

• In the supply chain.

For Circulation in VESCOP ONLY
Since 1962

1. Blockchain and Crypto codes are upcoming technology options considered for implementing secured traceability systems.

Global Scenario of Counterfeit medicines

According to the World Health Organization, an estimated 10 to 15% of the world's drug supply is counterfeit.

Global Standards and Country-wise Regulatory Authorities

GS1 (Global Standard)

1. provides the global and common language for traceability solutions and

2. aims to assist organisations and industries in the design and implementation of traceability systems based on the GS1 system of standards.

Each country has adopted GS1 or custom Traceability standards to implement their own Track and Trace system.

For example,

1. USA: US FDA enforced Drug Supply Chain Security Act (DSCSA) for products manufactured and distributed in US States.

2. Russia: Crypto Code based Track and Trace System designed by CRPT

3. India: Traceability based on DGFT (Directorate General of Foreign Trade) guidelines

4. Europe: EU FMD's EMVS Traceability system (All European Countries)

5. Brazil: ANVISA SNCM Traceability System

Traceability Concept #: Serialization

1. Definition: Generating and applying a unique serial number for each unit (Saleable) product to identify it individually at different times in the supply chain

2. Serial Numbers along with other identifiers are printed (on flap) or body on each product in human readable form as well as machine readable form.

For Circulation in VESCOP ONLY
Since 1962

Traceability Concept #: Aggregation

1. Definition: Process of packaging and grouping more than one unit (saleable) products and form a group package.

2. Each aggregated box is also labelled with a unique serial number.

Traceability Concept #: Data Sharing

1. Definition: The creation, storage and sharing of product traceability data from one party to another as the product moves across the supply chain.

2. Global and Country specific specifications and standards are established defining the:

- Data Format
- Data Elements and Contents
- Data Transfer methods

Product Packaging Examples-

1. Primary- Unit Packaging Level

Definition: Primary packaging refers to the materials that make direct physical contact with the product. This level of packaging is often called the retail or consumer packaging of an item.

2. Secondary- Case Packaging Level

Definition: Secondary packaging is the exterior packaging of the primary packaging that groups packages and further protects or labels the drug product.

3. Tertiary- Shipper Packaging Level

Definition: Tertiary packaging is used for the transport and safe handling of goods or grouped packaging Tertiary packaging is used for bulk handling, storage, and distribution.

Product in Scope for Track and Trace-

1. Supplied Prescription (Rx) Drugs (registered & non registered)

2. Supplied OTC Drugs (registered & non-registered)

3. Vaccines

4. Narcotics

5. Food Supplements

6. Herbal Health Supplements

*Product category may vary from one country to another based on the regulated marked requirements.

Packaging Sequence-

Primary packaging

Secondary packaging

Bundle

Carton/Case

Pallet

ACGI Track and Trace Solution-

VERZSHIELD

ACGI Verishield Systems

1. Unit Serialization

VeriShield CA Series

- Solution for Serialination on Carton Pack
- Integrated solution for Carton Printing Inspecting and rejection
- Muli funtional solution, also support non-sterilization mode

2. Aggregation

- Solution for Aggregation requirements on Carton Bundles & Shipper
- Camera based multi layer aggregation

3. Pallet Aggregation

For Circulation in VESCOP ONLY
Since 1962

- Solution for Aggregation requirements on Pallet
- Scanner based aggregation and verification solution

ACGI Verishield Software Solution-

- Global Track and Trace
- Centralized data repository
- Order based production
- Configurable serial number
- Virtual line management
- Standardised XML interface

ACG Inspection Systems Pvt. Ltd. Is a voting Global Member of GS1 Healthcare since 01st January 2019.

For Circulation in VESCOP ONLY
Since 1962

Inspection product portfolio

Inspection of the product is done to makes sure that the final product that reaches the market meets the requirement and comply with the specifications. Qualishield contains series of devices that are used for quality control which includes: -

1. Qualishield BS series
2. Qualishield PH series
3. Qualishield CV series
4. Qualishield CF series
5. Qualishield CL series
6. Qualishield BF series

1) Qualishield BS series

This is a blister inspection system that ensures consistency in packing with high speed and high resolution. Tablets with defects are rejected at end of the line and goes into the rejection bin.

can be used for tablets, capsules and soft gel.

Different models include: -

- Qualishield BS1
- Qualishield BS20
- Qualishield BS30

2) Qualishield PH series

It is a pinhole detection system that is integrated with a blister packing machine and helps in the detection of pinholes, fissures and pores on blisters.

Holes up to 25 microns can be detected and such blisters are rejected. It makes use of LED lights as a source and detectors detect any light passing through, if the light is detected blisters are rejected. This type of system is used only for aluminium foil blisters.

3) Qualishield CV series

For Circulation in VESCOP ONLY
Since 1962

Used for inspection of barcodes, pharmacodes, human-readable data on the carton, leaflets and aluminium foil. This can be clubbed with a blister suite as per requirement.

Carton print inspection and reject system :-

a) Qualishield CV10 and Qualishield CV20.

These are used for folded carton. it contains online carton code printing, inspection and rejection. Qualishield CV20 is slimmer and has a higher speed.

b) Qualishield CV30 and Qualishield CV40

These are used for offline carton printing and inspection of unfolded carton and leaflets. Consist of stacker and feeder mechanism.

4) Qualishield CF series

These are used for capsule filling inspection. It makes use of embedded machine technology, optics, high intensity LED lights and solid-state electronics. Overfilled or underfilled capsules are rejected using this system.

5) Qualishield CL series

It does a high-speed inspection of the liquid level and closure system of bottles; the product is rejected if the bottle is overfilled/ underfilled or if the cap is not properly secured. Makes use of LED lighting and optics for detection.

6) Qualishield BF series

Involves online inspection and rejection of faulty tablets/ capsules over counting machine. These are available with or without individual track suction mechanism for tablet. Working is same as BS series only difference is that this system is used for bottles.

ACG Important Equipment's

➢ List of equipment of solid dosage form

Tablet	Capsule
Granulation machine	Granulation machine
Tablet press and tooling	Empty hard capsule
Tablet coating machine	Capsule filling machine
Tablet inspection machine	Capsule checkweighers
Packaging films and foils	Packaging films and foils
Blister packing machine	Blister packing machine
Cartoning machine	Cartoning machine
Track and trace and inspection solutions	Track and trace and inspection solutions

ACG engineering install 20,000+ machine in the 100+ present countries with satisfied customers need from last 20+ years of unmatched experience in process optimization to formulate 5000+ formulation.

➢ Aftermarket Solution (after sale services)

- Spares:

For ACG engineering machines

- Services:

Installation and commissioning

Call based service

AMC service

Technical consulting

Upgrades

➢ Granulation

Advanced closed loop granulation system

ACG provides a modern integrated granulation system that addresses these cost, compliance and efficiency expectations.

It starts from the charging of powders in the High-shear mixer (HSM) for granulation, and continues with the transfer of wet granules through the wet mill, then onto drying in the fluid bed dryer (FBE), to the dry mill, and finally to be discharged into a binder blending equipment.

ACG's GT X-ONE is an integrated granulation technology platform that allows for high-volume production of granulated intermediates and increased output, driving efficiency at a higher scale.

- Integrated granulation suites with 12 bar pressure shock resistance available.
- Range of solutions including R&D scale machine 0.1-5.5 kg and production scale machines 5-745 kg.
- Machines to handle batch sizes from 200 ml to 1275 Liters available.

➢ Encapsulation

- More than 1600 installations worldwide for different types of capsule fillers.
- Ability and expertise to encapsulate wide range of difficult formulations. Encapsulated more than 3000 formulations worldwide.
- Encapsulation principles – tamping and dosator to suit different formulation needs.

High yield capsules filling machine

Patented ZRO design for dust free operation and improved yield.

Accura 20DFF is used for 100% capsule check weighing.

Capsules output for R&D scale machine is 1000-6000 capsules/hrs. and production scale machines are 40,000-2,00,000 capsules/hrs.

Capsules machines	Number of capsules/hrs.
AFT LAB	6,000
AF 25T	25,000
AF 40T	40,000
AF 90T	90,000
AF 150T	1,50,000
AF 200T	2,00,000

Tableting

From granulation, tablet presses, and coaters to blister packaging films, foils, and machines, ACG provides everything needed to manufacture and package tablet-based products.

Granulation machine-FBE X-ONE: Unique X.ONE inflatable seals, MOST (Maximum Operational Safety Technology) safety concept

Tableting machines are patented InstAmend® technology, it has modular design. The benefit is changeover can be done is less than 60 minutes.

Tablet output are as follows:

For Circulation in VESCOP ONLY
Since 1962

R&D scale machine: 1,26,000-2,16,000 tablets/h

Production scale machines:489600-816000 tablets/h

Tablet coating machine- patented ACGX-ONE NOZZLE with this machine the efficiencies achieved is over 95%. The pattern is guided horizontal air-flow, Anti-bearding cap ensures negligible beard formation & gun choking Built-in WIP system - Cleaning made easy.

Batch size

R&d scale machine: 0.1-36kg

Production scale machines: 35-1000 kg @ BO OF 0.65 g/sec.

ACG has an entire range of *tooling solutions* including:

Multi -tip, Specialized, Customized.

To name few machinery

1. LEGACY 6100
2. PROTAB SERIES
3. Tablet tooling
4. SMARTCOATER SERIES

With ACG specialized machines the production cost is reduced, Increased operator safety, Boost's production efficiency.

ACG is a complete blend of technology and simplicity which ensures the customers' needs are fulfilled and quality is being provided.

Tablet machines	Features and advantages
Protab 300	R&D and pilot scale tablet press Simplified tableting process Fastest mechanical changeover in 30 mins or less Simplified and fastest
Protab 700	Large scale double rotary tablet press
Legacy 6100	Better accessibility to the pharma zone, Virtually tool free changeover, Improved revenue optimization, High quality versatile tablet press, Greater flexibity, Precise weight control, Improved productivity.

Packaging product family

1. Primary packaging

- BMAX-SCADA / 21 CFR Part 11 compliance software and hardware with SMART HMI
- Compatible with format parts of BQS blister machine of ACG

For Circulation in VESCOP ONLY

Since 1962

- Latest generation servo technology for machine operation
- 21 CFR part 11 compliant system

2. Secondary packaging.

- Tuck in, gluing and tamper evident cartons can be packed.
- Combi pack collation and Cartoning with 220 mm carton length.
- Easy and quick changeover due to less format parts.
- Efficient, seamless packaging

Customized Packaging solutions:

ACG provides packaging according to the needs of the customer.

Blister cycle-R&D scale machine: 25-30 cycles/min.

Production scale machines: 45-50 cycles /min.

Wide range of packaging films and foils.

Other alliances include:

Proditec -Visitab series	from France	Production
Theegarten -Pactec-FP series	From Germany	Packaging machine (pillow packing or pouch packing)
Pharma gel	From Italy	Soft gel encapsulation capsule technology

Manufacturing and assembly units of ACG are located at:

1. Manufacturing unit-Pune
2. Assembly unit- Mumbai

For Circulation in VESCOP ONLY

Overview Of Packaging Films and Foils

Mr. Abhay Anil Joshi
Business Development
ACG Films and foils

There is various purpose of packaging which includes:

- Barrier protection
- Containment or agglomeration
- Information transmission
- Marketing
- Portion control
- Security
- Physical protection

Importance of packaging:

1. Protect against all adverse external influences that can alter the properties of the product.
2. Protect against biological contamination
3. Protect against physical damage
4. Carry the correct information and identification of the product
5. Tamper evident or child resistance or anti-counterfeiting

Functions of packaging:

1. Containment
   - Not to leak, nor allow diffusion and permeation
   - Film and foils should be strong enough to hold the contents during handling
2. Protection
   - Films and foils should give protection to the product against light, moisture, oxygen, biological contamination, mechanical damage and counterfeiting.

Characteristics of packaging:

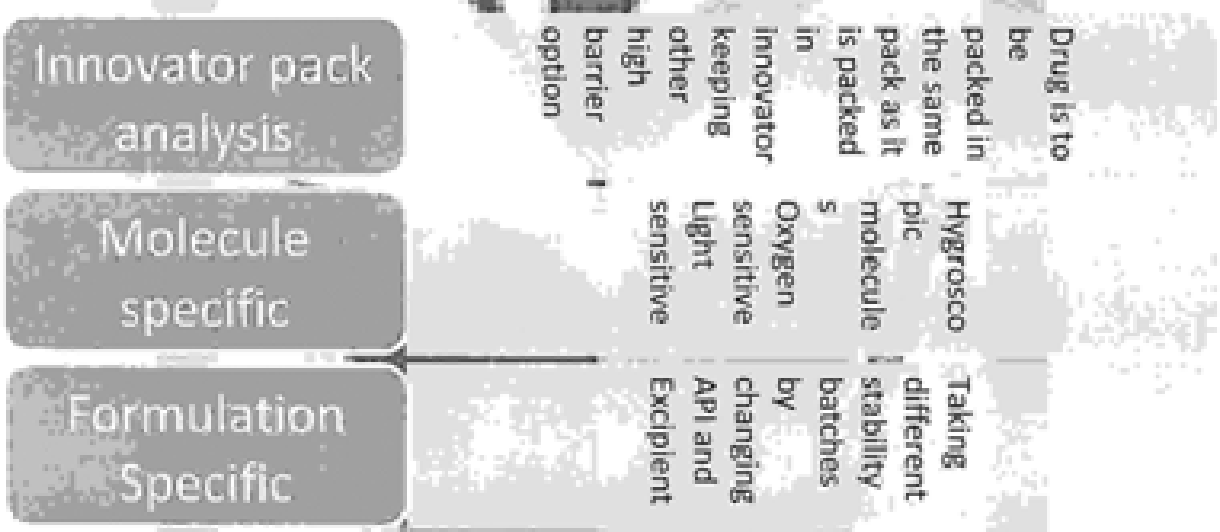
1. It must protect the physical properties of all dosage forms and protect them against damage or breakage.
2. It must not alter the identity of the product
3. It must preserve the characteristic properties of the product to comply specifications
4. It must protect product against undesirable or adulterating chemical, biological or physical entities.

For Circulation in VESCOP ONLY
Since 1962

Selection of packaging:

1. To provide barrier against light and moisture:
   - Colored PVC (polyvinyl chloride)/ PVdC (Polyvinylene dichloride)
   - Colored PVC/ Aclar (Polychlorotrifluoroethylene)
   - CFB (Cold forming Blister)
2. To provide barrier against gas(O_2) and light:
   - Colored PVdC or EVOH (Ethylene-Vinyl alcohol) based film
3. To provide barrier against gas (O_2) and moisture
   - PVC or PVdC
   - PVC or EVOH or Aclar
   - CFB
4. To provide barrier against gas (O_2), light and moisture
   - Colored PVC or PVdC
   - Colored PVC or Aclar
   - CFB

Methodology for selection of packaging material:



Strategic importance of packaging:

1. Choice of packaging materials depends on the type of stability testing done.
2. The packaging chosen should reduce the total cost including logistics and should also reduce the carbon-footprint
3. Packaging operations should reduce the cost and maximize the OEE (Overall Equipment Efficiency)
4. The packaging should be such that the design is acceptable to the consumer,
5. The packaging should be such that it does not affect the stability of the product, pass the specifications and must not hamper the drug performance.

Barrier classification product:

Ultra High Barrier	Moderate Barrier	Low Barrier
Ranitidine	Ciprofloxacin	Dicycloverine
Omeprazole	Losartan	Calcitriol
Lansoprazole	Escitalopram	Ofloxacin
Valacyclovir	Irbesartan	Methyldopa
Losartan	Quetepine	Donezepil
Perindropil	Sitagliptine	Chloroquine
Atorvastatin	Metformin	Benzafibrate
Venalaflexin	Prochlorperazine	Cefalexin
Ropinirole	Ibuprofen	Glicazide
Valsartan	Paracetamol	Enalpril
Candesartan	Citalopram	

Barrier classification packs options:

Ultra High Barrier	Moderate Barrier	Low Barrier
ACG Aclar® based laminates	PVC / PVdC	PVC
Ultrasafe, Tripac and Core	Ultrasafe, Dupac	APET
PVC or Aclar		PET-G
PVC / EVOH / Aclar		PP
Cold form blister		

Moisture barrier chart:

- Barex 250 has the highest water vapor transmission rate of 8.07 g/sq.m/day at 37.8° C and 90 % RH which shows that it has lowest barrier property against moisture
- PVC/EVOH/Aclar 190/70/152 has the lowest water vapor transmission rate of 0.02 g/sq.m/day at 37.8° C and 90 % RH which shows that it has ultra high barrier property moisture.

Oxygen barrier chart:

- PVC / Aclar 250/15 has the highest oxygen transfer rate of 16.43 at 23°C and 0% RH which shows that it has lowest barrier property against oxygen
- Ultrasafe tripac has the lowest oxygen transfer rate of 0.04 at 23°C and 0% RH which shows that it has ultra high barrier property against oxygen

ACG FILMS AND FOILS PRODUCT RANGE:

1. Aluminium foils
    - Tropical Foils
    - CR / SF foils
    - Alumlid- Lidding foils
    - Alumpack-base foils
2. Speciality films
    - Unidose™- Unit dose
    - Suppose™ - Suppository
    - Alubliss™- Alu-look alike
3. PVC Films
    - TRIPAC
    - DUPAC
    - ECOPAC
4. High Barrier Films
    - Ultrasafe
    - Aclar
5. Anti-counterfeit packaging solutions
    - Brandshield

ACG Films and foils produce 38000+ tons of packaging films and foils annually.

For Circulation in VESCOP ONLY

Since 1962

Industry Internet of Things- ACG's Roadmap into the future:

Maintenance types for Machine health:

- Preventive Maintenance: Machine is still in usable condition
- Predictive Maintenance (Tangible Benefits): Uptime improvement, Cost reduction, Reduction of safety, health, environment and quality risks, Lifetime extension of aging asset, Higher customer satisfaction

Reasons for reduce productivity is due to machine breakdown and suboptimal parameters which leads to loss in profit and loss of customer trust.

To resolve this issues, ACG's are planning to introduce ACG's Smart Connected Gateway Kit which will help customers in understanding what machine will exactly need to operate optimally also improved productivity can be managed by uptime improvement and optimal parameters which lead to increase in profit and greater customer trust.

Working of ACG's Smart Connected Gateway Kit:

1. Adaptor kit which needs to connect with internet which will then Gatrway all the data to Secure Cloud which will be connected to Device and results in Web Application
2. Multiple data points will collect a variety of information: Like temperature, vibration sensors, process parameters (Speed of the machine) plus it will also alerts, reports, and emails so operator can take timely action.
3. Monitor the Machines, Anytime, Anywhere: Visualize all the kind of data related to Key Performance Indicators (KPI), Trend visualizations and Machine settings.
4. Network Operating Centre: ACG's experts will monitor machines and they identify the corrections and notify the same to customers.

Communication between Machine and Cloud to secure customers data will be achieved through

- Device registration and passkey management
- Multi-layer security
- Proprietary PLC drivers
- Isolated network (VPN)
- TLS1.2 based 2048-bit encryption SSL certified transfer
- Firewall integration and Unidirectional dataflow
- STAR certified system

Immediate benefits that will be provided by Smart Connected Gateway Kit are:

1. Anywhere, anytime access will be available
2. Real-time alarms and Proactive alerts and services will be provided

3. Breakdowns will be avoided

For Circulation in VESCOP ONLY

Benefits that will be for overtime are:

1. Increased uptime due to predictive maintenance
2. Preventive maintenance planning
3. Forecast spares requirements
4. Data-driven overall equipment efficiency

ACG Smart Connected Maturity Model:

Phases	Time Period	Objective
1: Connectivity and Visualization	0-3 months	Connect, Remote access and Visualization
2. Capturing Process Knowledge	6-8 months	Machine learning
3: Predictive Maintenance	8-12 months	Improved Operating Equipment Efficiency (OEE), AR platform
4: Predictive Quality	[illegible] years	Improved OEE (Quality), Transfer Learning, Predicting Failure, TCO,
5: Prescriptive Automation	[illegible] years	Self-Diagnosis and Reporting, Regulatory Compliance, OTA updates

Industrial Visit Report A.Y 2019-20

PROGRAM COMMITTEE

Details of activity:

Name of the Activity	**Visit to ACTREC**		
Day, Date	Thursday 31/12/2020	**Department/ Committee/Faculty**	
Venue		**Time**	
Nature of activity	Field work	**Total no. of participants**	15

Activity Information:

Objectives	1. Visit to a research organization 2. to understand the research process
Outcomes	The activity correlated to courses Pharmaceutics, Medicinal Chemistry and Pharmacology Students were be able to 1. Understand the functioning of a research centre 2. See research demonstrations 3. Learn the concept of scientific data and data analysis 4. Visualize the application of theoretical knowledge and helped in experiential learning about radio pharmaceuticals and cancer research

ADVANCED CENTRE FOR TREATMENT, RESEARCH AND EDUCATION IN CANCER (ACTREC) OPEN DAY 2020 (online)

Date of conduction: 31 December, 2020

Time of conduction: 12:00pm-1:15pm

Mode of conduction: ACTREC official website

Location of centre: Kharghar, Navi Mumbai.

Organizer: ACTREC

The virtual tour to ACTREC laboratories made us witness the actual functioning of research lab and high end facility of research equipments.

Dr. Satish Munnoli, Officer In-charge - Scope cell enlightened us about their aim behind this online visit to their centre. He gave us an overview of many research laboratories and facilities including experiences of researchers in the campus.

Dr. Prasanna Venkatrman, Deputy Director of Cancer Research Institute and Dr. Abhijeet De, Principal Investigator and convenor of academic committee spoke about the history of their centre and gave us a brief overview of it's mission and activities.

ACTREC is a research campus of Tata memorial centre (TMC) and is affiliated by Unit of department of atomic energy by Government of India. ACTREC offers Phd in health and life sciences and it conducts various national and international meetings, sessions and conferences related to cancer. It focuses on finding reasons and solutions to solve cancer related mysteries.

ACTREC also provides service helpline to quit tobacco. This helpline tells alot about methods of quitting tobacco.

Prof. Rajesh Dixit, Director Centre for Cancer Epidemiology discussed the public health relation and population genetic research. He focussed mainly on identifying the burden of Cancer in India, it's prevalence of risk factor and policy development.

Dr. Navin Khattry, Deputy Director enlightened us about the 3 major disciplines- surgical oncology, medical oncology and radiation oncology. All these disciplines are followed to ensure

Dr. (Mrs.) Sunita S. Shidhaye
Principal
Vivekanand Education Society's
College of Pharmacy
HAMC, Behind Collector Colony,
Chembur, Mumbai - 400 074.

that the patients are treated with the best available facility. Since 2007, more than 750-800 transplants are been carried out in the largest centre of the country.

Dr. Arvind Ingle, Officer In-charge of lab Animal facility at ACTREC discussed alot regarding the use of animals in research. He discussed the dimensions required for keeping animals, it's storage conditions and protocols. He showed us rat breeding colony, different strains of rat and hamster, etc

Tumor Immunology group works in a lab which focuses on understanding reasons for immune dysfunction and also manages to learn stem cell role, tissue regeneration and repair, etc. Bhattacharya lab works on an organelle biogenesis, vesicular trafficking.

Chillakapati lab uses Raman Spectroscopy for diagnosis of oral and cervical Cancer. They discussed the principle behind raman spectroscopy and it's application. They also demonstrated it's working.

Dr. Sanjeev Waghmare lab tries to understand molecular signal network behind tight regulation and maintenance of stem cells by using skin as a model. Biology of brain tumor, epigenetics are also studied at this centre.

Dr. Sudeep Gupta, Professor of Medical Oncology, Director TMC shared their vision of foccusing on high quality research in causes, progression and treatment of Cancer. They also believe in achieving good quality Cancer care. Challenges in Cancer therapy was also discussed which included the resistance to anti-cancer drug and tumor variability.

Dr,. Prassana demonstrated the loading of agarose gel. She also demonstrated the cloning and protein purification by affinity chromatography. Mr. Sashi Dolas, Scientific Officer demonstrated the mass spectrometers instrumentation and application. They covered the steps to follow and precautions to take while using spectrometers.

Data analysis was also discussed in this tour. They gave us a demonstration on how to get results from data and how to use the software. A detailed demonstration of Western blotting technique was given by Teni lab. They covered each and every pointbright from sample preparation to transferring protein on membrane. They also taught us how to get a specific protein from this technique by using primary and secondary antibodies.

Alot of researchers from various lab gave us an insight of the work they do. Their main focus is to find a novel treatment therapy that increases the chance of Cancer patient survival.

Conclusion:

The virtual tour to ACTREC, Navi Mumbai, was a great opportunity for us to experience the working of various labs in Cancer research. We learned a lot through various demonstrations of equipment and technique involved in Cancer research.

This opportunity gave me an insight on cancer research. Such visits can surely motivate many students to pursue reserach as a career option.

PREFACE

I, Ms. Ankita Rai of T.Y B.Pharm (Div-A), seat number 63221, have attended an online industrial training at Anchrom laboratories located at Mulund.

I would like to thank Mr. Amit Palande (Application Chemist), the Principal, Dr. (Mrs.) Supriya Shidhaye and our class co-coordinators Dr. Anand Chintakrindi (Div A) and Mrs. Vidhi Bhatia (Div B) for this valuable opportunity.

Ms. Ankita Rai

Mrs. Vidhi Bhatia &

Dr. Anand Chintakrindi

(T.Y. Bpharm Class-Coordinators)

Introduction to Anchrom

- Anchrom Enterprises (I) Pvt. Ltd. Is one of India's oldest companies in analytical instruments supply. Being founded by a technocrat, Anchrom created a niche for itself in the Thin Layer Chromatography (TLC) technique which later became High Performance Thin Layer Chromatography (HPTLC).
- Anchrom is dedicated to the technique of TLC and HPTLC since inception i.e. 1978 which is ably supported by their Principals M/s CAMAG of Switzerland and by their India-specific HPTLC Application Research Laboratory established in 1989. The world's first, new generation "HPTLC- PRO" was installed in their lab in 2019. As a "Voluntary" Corporate Social Responsibility, they offer free training on HPTLC and support researchers with subsidised analysis. Anchrom is proud to be "Technologists, not Traders!"
- This lab today occupies almost 1800 sq.ft. space, has 13 analysts and all the latest CAMAG software and instruments.This lab enables everyone to evaluate HPTLC, CAMAG and Anchrom before they decide to buy HPTLC. This lab is the reason why CAMAG-Anchrom has had more than 95% share of the Indian market for decades. Free-training on the latest CAMAG HPTLC has been given by them since 1994 to post-graduate and Ph.D. students, their teachers and government lab employees.
- New method development is their forte and commercial sample analysis is not done by them. Concerned persons are welcome to be present during their analysis. They have analysed > 900 different substances, analysed > 12,000 samples and trained free of charge, > 5000 analysts. Anchrom intends to be the world leader in routine HPTLC applications. Another concrete step in that direction is the installation of the latest "CAMAG PRO" HPTLC system in November 2019. It is the world's first installation outside CAMAG.

THE ANCHROM LAB FACILITY

Analytical Laboratory

Chromatography is a group of chemical analysis techniques, used to separate mixtures into individual components and then identify or quantify them. The most popular techniques are Gas Chromatography (GC), High Performance Liquid Chromatography (HPLC), High Performance Thin Layer Chromatography (HPTLC). In HPTLC, mixtures are resolved into their individual components, using a thin layer of adsorbent, coated on a "plate", usually 20 X 10 cm, in size.

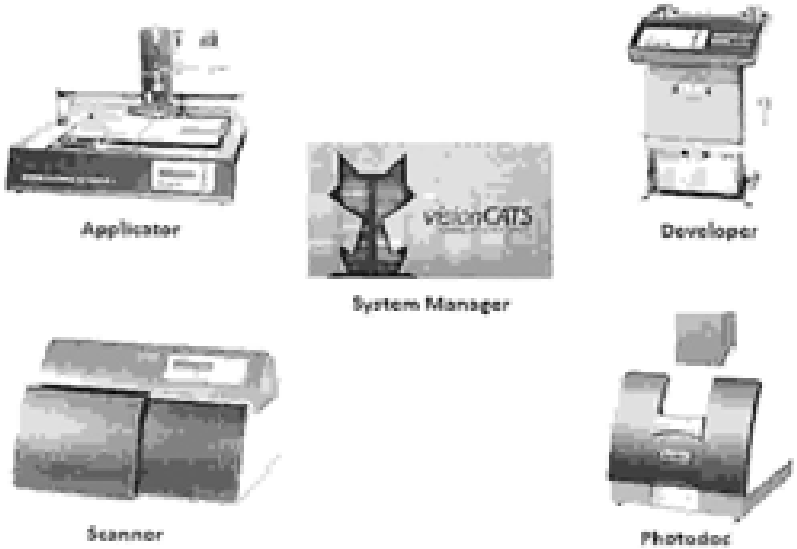
HPLC

Unique features of HPTLC are that it is the fastest, simplest, most economical and flexible, "visible" technique which can analyse in parallel more than 100 samples. It is risk free and multiple detections can be made without repeating chromatograms. It is several times faster and economical than HPLC, another liquid chromatography technique. HPTLC is used for the analysis of non-volatile organics such as pharmaceuticals, APIs, botanicals, forensics, foods, speciality chemicals, etc. for establishing purity, impurities, fingerprint and reverse engineering.

• High Performance Thin Liquid Chromatography

Prof. Egon Stahl made Thin Layer Chromatography (TLC) very very useful and popular by analysing thousands of compounds and publishing the data in a book in the '60s. High Performance Thin Layer Chromatography (HPTLC) is the modern version of TLC wherein the principals are the same but the practice is fully automated and GLP/USP/EP compliant. As a liquid chromatography technique, HPTLC can analyse most non volatile organic samples. Its differential aspects are:

- Chromatography is visible and simple
- Little or no sample preparation
- Analysis of dozens of samples, concurrently
- Chromatogram immobilized on the plate
- Upto 8 detection modes, without repeating chromatography
- HPTLC Fingerprint- chemical composition of mixtures, represented as photographic images
- Very low cost of analysis and maintenance
- One HPTLC can be used simultaneously for 5-6 different sample analysis and persons
- Zero risk chromatography. Samples cannot contaminate or cross-contaminate
- Very high throughput. 100-120 samples/shift
- Urgent samples don't affect ongoing analysis



CAMAG -HPTLC

CAMAG, the world's pioneer and leader in HP-TLC software and instrumentation researched and designed instruments to take advantage of all above unique aspects.

CAMAG, manufactures in Switzerland manual, semi-automatic, automatic and recently completely automatic software controlled HPTLC Systems and certain special accessories like HPTLC-MS, Gradient Chamber, Method Development Chamber, Bioluminizer.

HPTLC "PRO" SYSTEM:

An entirely new generation of HPTLC System, specifically for Q.C. lab applications have been launched by CAMAG, Switzerland. There will be up to 5 identical looking instruments side by side with automated movement of plates. Each instrument will perform one step of the HPTLC procedure.

APPLICATION STEPS OF HPTLC "PRO":

1. Sample Application
2. Chromatogram Development
3. Derivatization
4. Detection By Hyperspectral Means
5. MS Interface

A sixth module will be for plate storage. Up to five plates can be chromatographed without manual intervention, with up to 3 mobile phases. As of April 2021, 3 modules i.e. Plate Storage, Application and Development have been released. Anchrom in Mumbai already installed the world's first Pro sold by CAMAG. Manufacturers for regulated markets, Indian regulatory authorities, and commercial analytical labs will rely on HPTLC "PRO", once they have evaluated it. Live demo in Mumbai on request.

CAMAG HPTLC PRO SYSTEM

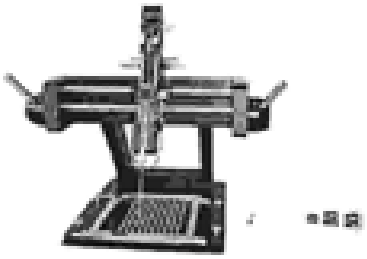
IATROSCAN:

The Iatroscan TLC/FID chromatograph is manufactured by LSIM, Japan and sold in India by Anchrom since 1978. It combines the advantages of separation by TLC (of non-volatiles) with detection by FID (popular detector in GC).
It is most ideally suited for SARA analysis i.e., Saturates, Aromatics, Resins and Asphaltenes found in petroleum oil. It is an official method (IP-469).
Most petroleum industry research and refining units in India have installed the same.Bio lipids is another area of great interest.

IATROSCAN TLC-FID CHROMATOGRAPH

SPOTTER FOR IATROSCAN:

SES GmbH, the German distributor for Iatroscan developed a semi-auto applicator for spotting on the "chromarods". The "chromarods" are reusable 15cm long quartz rods with a 75µm sintered layer of silica gel. Their diameter of 1mm makes it difficult to spot the samples. The SES spotter ideally solves this problem



SPOTTER FOR IATROSCAN

APPLICATIONS OF HPTLC:

★ Narcotics

Forensic analysis is the multi-disciplinary application of scientific knowledge and sophisticated instruments for investigating crime related materials and biological samples. A frequent but challenging aspect of forensic toxicology is the identification of unknown poisonous substances in lethal intoxication cases. HPTLC offers identification as well as qualitative and quantitative analysis for toxic substances, CAMAG HPTLC offers rapid identification of such toxins for antidote administration.

★ Food Analysis

Foods usually originate as botanical products and therefore are naturally variable as well as complex. HPTLC can confirm identities of complex mixtures as well as detect adulteration. HPTLC is the first method of analysis because it is simple, risk free, fast, economical and analyses 100-120 samples a day, without producing much waste. Anchrom has waged a war against adulteration and already created 50 internationally acceptable methods to detect adulterants, at a low cost for market surveillance.

★ Quantification Of Markers

HPTLC Fingerprint is a technique adopted by the US & European Pharmacopoeias recently for the purpose of identification of "botanical materials", all of which are very complex in nature. HPTLC Fingerprint is the representation of the phytochemical composition of a plant extract or formulation, in the form of a conventional image i.e. a photograph. Fingerprint can also be used to monitor batch to batch consistency and stability studies of herbal medicines, dietary supplements etc

★ Speciality Chemicals Analysis

High Performance Thin Layer Chromatography (HPTLC) is a valuable tool to check purity, impurity of any non-volatile organic industrial materials such as dyes, surfactants, pesticides, perfumery compounds, intermediates etc. It is far simpler, cheaper and easier to understand than other similar methods of analysis. HPTLC can be used very effectively in reverse engineering because it enables rapid comparison with e.g. standard provided by a buyer or other similar products in the market. Chemical reactions can be studied very quickly e.g. within 2 hours. Complex mixtures like biological samples, reaction mixtures,

fermentation broth can be easily chromatographed without much sample preparation.

★ Dyes & Intermediates Analysis

Dyes and intermediates are non-volatile organic substances and so best suited for HPTLC analysis. HPTLC analysis is very low cost and results are "visible". Coloured substances are therefore particularly ideal for HPTLC analysis. HPTLC enables comparison of different samples or with standard analysis of competition samples apart from purity and impurity determination. All kinds of optical brightner, intermediates, dyes and banned amines can be analysed by HPTLC.

★ Biotechnology Applications

HPTLC is a most versatile analytical technique which offers a great separation power using precise sample application, software-controlled chromatographic steps, chromatogram development and scanning and photo documentation. Separated samples can be visually checked on the plate is an unique aspect of HPTLC. Biotechnology industry is considered as one of the most research-intensive sectors in the world. Therefore, shorter analysis time, low sample analysis cost per sample, minimal contamination possibilities and reliable accurate results are essential which are provided by HPTLC. HPTLC can analyse different samples simultaneously with zero risk of cross contamination. HPTLC also offers the advantage of evaluating a plate by any specific process using different detection modes (UV, fluorescence, etc.) By coupling HPTLC with a MS or other suitable methods such as NMR, FTIR, ESI, MALDI, one can identify and or confirm the chemical structures of the analyte under study.

★ Cosmetics Analysis

Sunscreen products are widely used across the globe due to their benefits of preventing skin from tanning and sunburns. The UV filters used in such formulations protect the skin from harmful UV rays by forming a thin, protective layer on the skin thereby blocking or absorbing UV rays from penetrating the skin. The safety of such products is of vital importance since they tend to interact with the biological matrices. In order to shield the consumer's health from any harmful effects, HPTLC technique can be employed for the detection of such filters, the identity of which can be further confirmed by mass spectrometer.

Conclusion

The online internship at Anchrom laboratories was an enriching experience. Even though it was online all videos about working and use of every equipment were taught. Even a full fledged virtual tour was also given, to provide insight. I learned HPTLC and it's applications in detail. This opportunity gave me an insight into Analytical departments of a pharmaceutical laboratory. It has overall nurtured in me a spark to develop a professional outlook towards the work and profession.

Acknowledgement

I would like to express my gratitude to Mr. Amit Palande and his team for this invaluable opportunity.

I am thankful to them for training me and allowing me to gain maximum knowledge during the online training.

I would also like to thank the Principal, Dr. (Mrs.) Supriya Shidhaye and my class-coordinators for giving me this wonderful opportunity.

Conclusion

- The online internship at P&G Consumer Health (MAPLab), Chembur, Mumbai, was an enriching experience. Even though it was online all videos about working and use of every equipment was taught. Even a full fledge virtual tour was also given, to provide insight.

- I not only learnt about the practical applications of my theoretical knowledge, but also understood the importance of following appropriate laboratory protocol as is required by a formulation and analytical scientist. This opportunity gave me an insight into the Research and Development process as well as Analytical and Formulation departments of a pharmaceutical laboratory.

- It has overall nurtured in me a spark to develop a professional outlook towards the work and profession.

Acknowledgement

I would like to express my gratitude to **P&G (MAPLab)** for this invaluable opportunity.

I am thankful to **Mr. Inder Gulati** (Formulation R&D Lead), **Mr. Tarun Goel**(Analytical Head),and **Mr. Bikram Bhowmik**(Packaging Head) for training me and allowing me to gain maximum knowledge during the online training.

I would also like to thank the Principal, **Dr. (Mrs.) Supriya Shidhaye** and my class-coordinator **Mr. Keyur Shastri** for giving me this wonderful opportunity.

Dear Final Year B Pharm students,

Kindly refer to the trailing mail of Dr Neha Chhabra Madam, you will be attending a Demo of GastroPlus software on July 17th, 10 AM – 12 noon (Link to follow).

Tomorrow's minor changes in the Final Year B Pharm time-table will be mailed to you by today evening.

With Best Wishes

Mr K V Shastri
Assistant Professor
Vivekanand Education Society's College of Pharmacy

Respected seniors and dear colleagues,

Greetings to all of you!

We are organizing a lecture on the Demo of GastroPlus software on July 17th, 2021, 10 AM - 12 noon (Link to follow). The demonstration of the software is a part of M Pharm (Pharmaceutics) Sem II curriculum. However, you

C2C Activity Report A.Y 2021-22

C2C DEPARTMENT/ COMMITTEE/ FACULTY

IQAC ACTIVITY No: (To be included from A.Y. 21-22)

Details of activity:

Name of the Activity	Demo of GastroPlus	**Activity No.**	
Day, Date	17/7/2021	**Department/ Committee/Faculty**	C2C/ Dr. Neha Chhabra
Venue	Online	**Time**	10 a.m.-12 noon
Nature of activity	Indoor/Outdoor (Tick mark appropriate)	**Total no. of participants**	118

Activity Information:

Objectives	The give demonstration of gasto plus software to students and faculty members
Methodology	The various applications of this simulation software were demonstrated step-by-step using screenshots. The interactive questions and answers session gathered the interest of the budding researchers
Outcomes	The session enlightened the students in alignment with our programme outcomes mentioned below: • Pharmacy Knowledge – Possess knowledge and comprehension of the core and basic knowledge associated with the profession of pharmacy, including biomedical sciences; pharmaceutical sciences; behavioral, social, and administrative pharmacy sciences; and manufacturing practices. • Planning abilities – Demonstrate effective planning abilities including time management, resource management, delegation skills and organizational skills. Develop and implement plans and organize work to meet deadlines. • Problem Analysis – Utilize the principles of scientific enquiry, thinking analytically, clearly and critically, while solving problems and making decisions during daily practice. Find, analyze, evaluate and apply information systematically and shall make defensible decisions.

Dear Madam,

This is with reference to trailing mail, regarding visit to IDEMI Patent Facilitation centre. I hereby convey the confirmation for an online visit to IDEMI IPFC on 12th March 2021.

Visit details are as follows:

1. Visit will be completely on an online platform.

2. Rs. 50 will charge per student for the visit. IDEMI bank details are attached herewith for making payment.

3. Online student registration is compulsory for the visit. Registration link is provided below.

https://docs.google.com/forms/d/e/1FAIpQLSegX7yahQD5mx4gqQjgL90Fb9axkE7BMAyisTtYsj88RCrR1A/viewform

4. Payment should be made only after complete registrations of all students.

5. Online link & timing for the visit will be shared only after confirmation to visit & full payment.

6. Registered students list should be shared with IDEMI before the visit.

This is for your kind information. Kindly confirm all the above said details from your end.

Thanking you,

FLYER / Schedule:

Dr. (Mrs.) Sunitya S. Shidhaye
Vivekanand Education Society's
College of Pharmacy
NAME, Sindhu Collector Colony
Chembur, Mumbai - 400 074.

Resource Person : Mr. Sagar S. Joshi
Affiliation: Senior Technical Assistant (IDEMI, Sion, Mumbai)

Background:
IPR allows a startup or a researcher to compete effectively against large companies after patenting its invention. If a startup has a unique unpatented invention, larger rivals can easily copy, manufacture, and market it, effectively negating the startup's effort to create its invention. MoE's focus on creating and strengthening the culture of innovation and entrepreneurship ecosystem contributes to organization of such sessions for the students.

Objective:
The objective was to provide first-hand knowledge and information on Intellectual Property Right Support Services to the students. The IDEMI's Patent facilitation center provides assistance to the MSME's and start-ups.

Benefit in terms of learning/Skill/Knowledge obtained:
interactive session on IPR, copyrights, trademarks, geographical indications, industrial design and patents.

Details /MoM

1. The students were introduced to IDEMI, a subunit of the Ministry of micro, small & medium enterprises, Government of India.
2. The students were explained the importance of timely applying for trademarks, copyrights and patents for Start-ups with examples
3. The life-cycle of a patent, loyalty, its revision and infringement were explained.
4. Q&A session was conducted and active participation was seen

Hello Dr. Bhatia,

While visit to the premises is not possible, I will be able to provide latest photographs of the R & D facility during the online interactions. I can keep this session on 11th June from 3.0 to 4.0 PM. I prefer the teams or webex platform as Zoom is not accessible from my laptop. Let me know your thoughts so I will block my calendar accordingly.

Best Regards,

Kedar V. Chikhalikar

Dear Sir,

GREETINGS FROM VES COLLEGE OF PHARMACY !!

Thanks a lot for conducting online sessions for our students last year, Kind request to again conduct virtual online training for our students in the month of June. It would be great if you can show your manufacturing premises to the students so that they can understand the industrial operations in a better way , preferable dates are 10th and 11th June, kindly confirm your availability.

thanks and Best Regards

Mrs Vidhi Bhatia

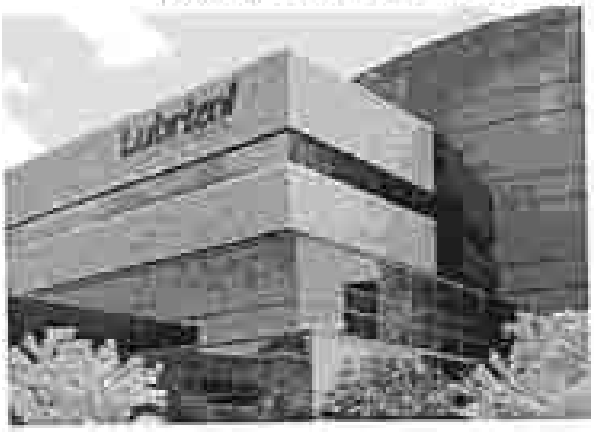
INDUSTRIAL VISIT REPORT ON LUBRIZOL



On 11th June 2021 Viveknaand Education Society's College of Pharmacy organized a Campus to Corporate (C2C) activity by Lubrizol Company. The session was conducted through online platform of Microsoft Teams and was very well hosted by Mrs. Rashmi Wani ma'am. Dr. Kedar Chikhalikar sir was the speaker for the session, he is the Head R & D (South Asia and Middle East), Lubrizol Life Science-Health in Lubrizol Advanced Materials India Private Limited. He shared a valuable piece of information about the company and some tips which can be advantageous for the betterment of all the students.

He shared a piece of guidance regarding confidence and leadership. He spoke about how confidence is the necessity in today's era. Confidence can hone one's personality and it is very much important to lead a team or group. Further he explained about why the leadership skills are important and how they can make difference in one's life.

Moreover, he conveyed some tips for the Curriculum Vitae (CV), what is its importance, how it should be designed and what elements should be included in it. He also mentioned about what aspects can make one's CV strong. Along with this he highlighted some points regarding interview skills such as how to appear the interviews, what kind of preparation should be done for the interview, what things should be avoided during interview.

Further he provided a detailed information about the company and the departments of the company, how is the working of the company, what procedures are followed, what are the equipment used for manufacturing and packaging processes. He showed some photographs for explaining about the same.

After the session the speaker, Dr. Kedar Chikhalikar sir answered all the queries of students and faculties very significantly. Then the session was concluded by the host Mrs. Rashmi Wani ma'am by giving vote of thanks to the speaker and Lubrizol Company for the wonderful session. The session was highly informative with respect to knowledge about interview ethics and future career opportunities. It was indeed a delightful and insightful session for all the students.

C2C Activity Report A.Y 2020-21

C2C DEPARTMENT/ COMMITTEE/ FACULTY

IQAC ACTIVITY No: (To be included from A.Y. 20-21)

Details of activity:

Name of the Activity	Virtual visit to MAP Lab P&G	**Activity No.**	
Day, Date	2nd June 2021	**Department/ Committee/Faculty**	**C2C**
Venue	Online	**Time**	
Nature of activity	Indoor/Outdoor (Tick mark appropriate)	**Total no. of participants**	220

Activity Information:

Objectives	To introduce the students to a research lab with various new equipment and machineries that would assist better understanding during their coursework
Methodology	Virtual visit via robot to the MAP lab, P&G
Outcomes	The session provided sufficient knowledge and skills of the topic in Pharmaceutical Sciences

PROOFS & DOCUMENTS ATTACHED (Tick mark the proofs attached):

✓	Notice and communication	✓	Feedback form
✓	Student list of participation	✓	Feedback analysis
✓	Photos	✓	~~Media news denin~~/ PR Post
	Certificate	✓	Any other

Online Inplant training of Ty students

Fri, May 28, 2021 at 3:27 PM

Gotati, Inder <gotati.i@pg.com>
To: Vidhi Bhatia <vidhi.bhatia@ves.ac.in>

Dear Vidhi mam,

We will be able to perform the training in first week of June

We can do this session on following days

1. 02nd June – 2.30 pm to 3.30 pm
2. 7th June – 3 pm – 4 pm

C2C Activity Report A.Y 2020-21

C2C DEPARTMENT/ COMMITTEE/ FACULTY

IQAC ACTIVITY No: (To be included from A.Y. 20-21)

Details of activity:

Name of the Activity	Virtual visit to MAP Lab P&G	**Activity No.**	
Day, Date	2nd June 2021	**Department/ Committee/Faculty**	**C2C**
Venue	Online	**Time**	
Nature of activity	Indoor/Outdoor (Tick mark appropriate)	**Total no. of participants**	220

Activity Information:

Objectives	To introduce the students to a research lab with various new equipment and machineries that would assist better understanding during their coursework
Methodology	Virtual visit via robot to the MAP lab, P&G
Outcomes	The session provided sufficient knowledge and skills of the topic in Pharmaceutical Sciences.

VIVEKANAND EDUCATION SOCIETY'S COLLEGE OF PHARMACY

Academic Year 2020-21

INDUSTRIAL VISIT

Class Third Year B Pharm

SEMESTER V and VI
(CBCS)

INDUSTRY VISIT TO MAP LAB (online)

Date of conduction: 7th April, 2021
Time of conduction: 11:00am -12:00pm
Mode of conduction: Microsoft Teams Application
Location of Lab: Merck lab, 7th floor of VES College of Pharmacy, Chembur.
Speaker: Mr. Inder Gulati.
Organizer: Dr.Aparna Palshetkar, Ms.Harsha Khatpalia, Dr.Rajashree Hirlekar, Dr.Supriya Siddhaye

The Map lab facility includes sitting area, Analytical area, pH meters and diffusion testers for transdermal formulations, 6 HPLC instruments, five chambers maintained at different conditions to evaluate the products at specified intervals, formulation area, an area for 3D printing, Store area, Conference room, etc.

Lecture on 3D Printing covered the types of 3D Printing, customization of tablet design and demonstration on working of 3D printing machine.

1) Types of 3D printing:

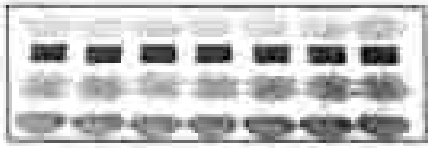
A. Powder Solidification : Drop-On-Solid Deposition & Selective Laser Sintering/Melting

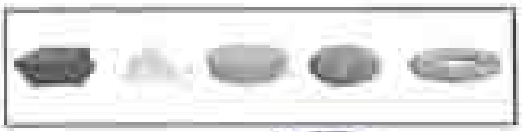
B. Liquid Solidification : Drop-On-Drop Deposition & Stereolithographic (SLA)

C. Extrusion Based System : Solid : Fuse Deposition Modelling (FDM) & Semi-solid: Pressure Assisted Syringe

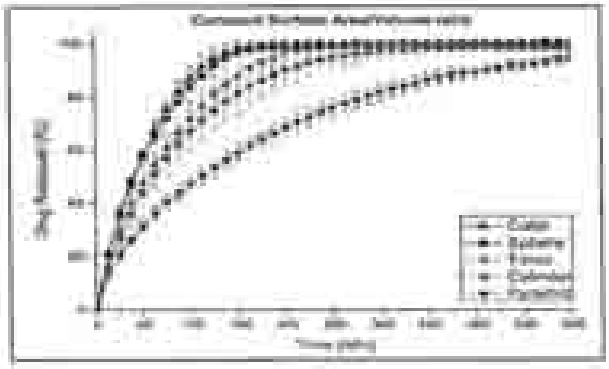
Dr. (Mrs.) Supriya S. Siddhaye
Principal
Vivekanand Education Society's
College of Pharmacy
HAMC, Bharat Mullick Colony,
Chembur, Mumbai - 400 074

2) Customization of Tablet Design:





Customization of dissolution profile: In the study, the authors has designed five tablets, each with a distinctly different shape — a cube, pyramid, cylinder, sphere, and torus using auto CAD software. They found that when the surface area of the printed tablets was kept constant, the drug release rates were the fastest in the pyramid-shaped tablet, followed by the torus, cube, sphere, and finally the cylinder.



Demonstration: Working of 3D Printing machine:

Steps:

1) Create 3D model of the requested object with a Computer Aided Design (CAD) program.
2) CAD file is exported to a printer recognizable file format, usually Standard Tessellation Language (STL) file.
3) This machine builds the part by layering material in every imaginable orientation.
4) Layers are always contoured two-dimensional in an x-y-plane, whereas the third dimension is caused by the stacking of layers on top of each other in z-direction.
5) Smaller the layer-thickness is, better is the quality of the final product. Big steps in z-direction lead to shift model or so called "stair-step effect".

Conclusion:

The online industrial visit (MAPLab), Chembur, Mumbai, was an excellent experience. Even though it was online, videos about working and use of 3D printer was taught. Even a full fledge virtual tour was also given, to provide insight.
I not only learnt about the practical applications of 3D printing in pharmaceutical but also understood the importance of following appropriate laboratory protocol as is required by a formulation and analytical scientist. This opportunity gave me an insight of the industry.
It has overall nurtured in me a spark to develop a professional outlook towards the work and profession.

Acknowledgements

We take this privilege and pleasure to thank the contributions of many individuals who have been inspirational and supportive throughout our MAP lab visit endowed us with most precious knowledge to see success in our endeavor.

I offer flower of deep gratitude to the Almighty God, who has been the source of strength throughout our lives.

We express our deep gratitude towards our Principal Madam Dr.Supriya S Shidhaye, Vivekanand Educations Society's College of Pharmacy, for arranging P & G lab visit , to help us understand how industry works , for her constant inspiration, competent guidance, keen interest and encouragement.

We are also very thankful Mr. Inder Gulati , Head MAP Lab, P & G Health, Procter & Gamble and Mr. Tarun Goel, Analytical R & D Lead, Procter & Gamble.

We would also take an opportunity to thank our Final year class coordinator Mr Keyur Shastri, Assistant Professor, Vivekanand Educations Society's College of Pharmacy for providing us such an opportunity at our U.G level.

Introduction to P&G

- **P&G**

P&G renames **Merck Limited** as **Procter & Gamble Health Ltd.** P&G is one of the largest and amongst the fastest growing consumer goods companies in India

Established in 1964, P&G India now serves over 650 million consumers across India. Its presence pans across the Beauty and Grooming segment, Household care segment as well as the Health and well-being segment, with trusted brands that are household names across India. Superior product propositions and technological innovations have enabled P&G to achieve market leadership in a majority of categories it is present in.

P&G operates under three entities in India - two listed entities **'Procter & Gamble Hygiene and Health Care Limited'** and **'Gillette India Limited'**, as well as one 100% subsidiary of the parent company inthe
U.S.called **'Procter & Gamble Home Products'**.

- **P&G Consumer Health**

P&G provides products to consumers over 100 countries and lies in the top 20 bracket of most successful companies in the OTC industry.

P&G India is committed to sustainable growth in India, and is currently invested in the country via its five plants and over nine contract manufacturing sites, as well as through the 26,000 jobs it creates directly and indirectly. Their sustainability efforts focus on Environmental Protection as well as Social Responsibility to help develop the communities they operate in.

P&G over-the-counter products include cough and cold remedies, products to relieve headaches, muscle and joint pains, women and children's health products, and dietary supplements including probiotics and vitamins.

- **MAPLab**

It is a prototyping laboratory that has been set up for the research and development of innovator products, the analysis of these products, as well as for creating unique packaging, on a small scale.

The facility comprises of a Formulation Lab, an Analytical Lab, a Stability Testing Room, a Packaging Unit, an HPLC Room, Stores, a Conference/Meeting Room and an Office.

THE MAPLab Facility

Analytical Laboratory

The Analytical laboratory contains instruments and equipments related to various tests that are carried out on the products.

The test to be carried out often requires concentrated or corrosive solvents, and these are contained in the **Fume Hood** which is ductless.

1. There were various sections and equipments including:
   Electrical Room
2. Instruments Room
   - pH meter
   - Vaccum oven
   - Oven
   - Disintegration Tester
   - Magnetic Stirrer
- Working Area

(a) Analytical Guidelines

These include the following

- The specific methodology which will be used to test a new product.
- Information regarding the importance of maintaining Laboratory Notebooks (LNBs).
- A specific aspect of laboratory operations.

- In house trial procedures.
- Method validation procedure.
- Cleaning validation analytical procedures.
- Process validation guidelines.
- Equipment validation guidelines.
- Product handling.

(b) pH Meter Calibration

pH meter is used for checking pH of various solutions. **Before measuring pH you have to calibrate** (standardize) **electrode**. To calibrate the electrode you need at least two solutions of known pH. Most commonly used commercially available calibration buffers have pH of 4.01, 7.00 and 10.00. Details of the calibration procedure depend on the pH meter model.
The general method involves dipping of the electrode in the solutions of known pH values and noting down the reading and the corresponding slope and offset values at the end, which should be within the specified range.

Outside the hot room, the lab has a **MilliQ Water Filtration** (double de-ionized water) and **Prefiltration Unit**. There are **Magnetic Stirrers**, a **Chiller** that can be set below zero, at zero or above zero degrees temperature for chilling as suitable, and a **Shaking Water Bath**, used if samples need continuous shaking over a large period of time.

(b) Dissolution

Dissolution is the physicochemical process by which a solid substance enters the solvent phase to yield a solution.

Dissolution Tester

The **Dissolution Tester** consists of eight dissolution cells, an auto sampler and a syringe pump. The auto sampler is mainly used when the samples need to be taken out at time intervals exceeding ten minutes. The auto sampler replenishes the media as well as dilutes the sample. It mimics the normal systemic conditions.

The results of all analytical tests are obtained by the use of **High Performance Liquid Chromatography (HPLC)**. The **Server Room** within the Analysis Laboratory contains backup data for all the HPLC tests and readings.

Acceptance Table 1

Stage	Number Tested	Acceptance Criteria
S_1	6	Each unit is not less than $Q + 5\%$.
S_2	6	Average of 12 units ($S_1 + S_2$) is equal to or greater than Q, and no unit is less than $Q - 15\%$.
S_3	12	Average of 24 units ($S_1 + S_2 + S_3$) is equal to or greater than Q, not more than 2 units are less than $Q - 15\%$, and no unit is less than $Q - 25\%$.

USP APPARATUS			
USP APP.	DESCRIPTOIN	ROT. SPEED	DOSAGE FORM
Type 1	Basket apparatus	50-120rpm	Conventional tablets, chewable tablets, CR
Type 2	Paddle apparatus	25-50rpm	orally Disintegrating tablets, chewable tablets, CR, suspensions
Type 3	Reciprocating cylinder	6-35 rpm	CR, chewable tablets
Type 4	Flow through cell apparatus	N/A	ER , poorly soluble API, powder, granules, microparticles, implants
Type 5	Paddle over disk	25-50rpm	Transdermal
Type 6	cylinder	N/A	Transdermal
Type 7	Reciprocating holder	30rpm	CR(non disintegrating oral and Transdermal)

The basket assembly consists of following parts:

- Covered vessel.
- Metallic Drive Shift.
- Motor.
- Cylindrical Basket.
- Water Bath.
- Auto sampler.

Method:

- The basket holds the sample and rotates in a round flask containing the dissolution medium.
- Out of the 8 flasks, 6 are used for sample analysis, 1 for reference and 1 or blank.
- The entire flask is immersed in a constant temperature water bath set at 37 degree Celsius.
- The rotating speed and the position of the basket must meet the specifications as per USP.
- The most common rotating speed for the basket is 100 rpm.

Working:

- The main operating principle of a paddle/basket apparatus is to provide a precise and controlled stirring and mixing mechanism at 37° C.
- The machine is automatic and it contains an LCD display system, where in the required information about time and volume of drawing out the sample, rotations per minute and the run time of the machine can be fed.
- The syringe pump, which is a part of the auto sampler, draws out required volume of sample.
- The sample that is drawn is collected in test tubes.
- The auto sampler then dilutes the sample to the required volume.
- Simultaneously, the media is also replenished in the stations.
- The diluted samples are then filled in vials and analyzed by HPLC.

The auto sampler of the dissolution tester can only be used when the time interval for drawing out sample is greater than ten minutes, as it needs sufficient time for diluting the sample and replenishing the media, as well as rinsing twice. If interval is below ten minutes, the process can be done manually.

(e) High Performance Liquid Chromatography

High Performance Liquid Chromatography (HPLC), is a technique in analytical chemistry used **to separate, identify,** and **quantify** each component in a mixture. HPLC is basically a highly improved form of column liquid chromatography.

Principle:

HPLC works on the **principle** that some molecules take longer than others to pass through a chromatography column. This depends on the affinity of the molecule with the mobile phase (liquid or gas) and the stationary phase (solid or liquid).

Instrumentation:

Main components in an HPLC system include the solvent reservoir, or multiple reservoirs, a high- pressure pump, a column, injector system and the detector.

Reservoir

The reservoir holds the solvent, which is referred to as the mobile phase because it moves. There are usually a minimum of two reservoirs in a system. At the MAPLab facility, usually four ports are used for the mobile phase, out of which one is for the washing solution.

Pump

A pump is used to generate a specified flow of the mobile phase.

Injector and auto-sampler

Although manual injection of samples is still possible, most HPLCs are now fully automated and controlled by computer. The injector, or auto sampler, introduces the solvent into a phase stream that carries the sample into the high pressure (up to 400 bar) column.

Column

The column contains specific packing material needed to effect separation. The packing material is referred to as the stationary phase because it is held in place by the column hardware.

Detector

A detector is needed to see the separated compound bands as they elute from the high pressure column. The information is sent from the detector to a computer which generates the chromatogram. The mobile phase exits the detector and is either sent to a waste, or collected, as desired.

Detectors used in HPLC:

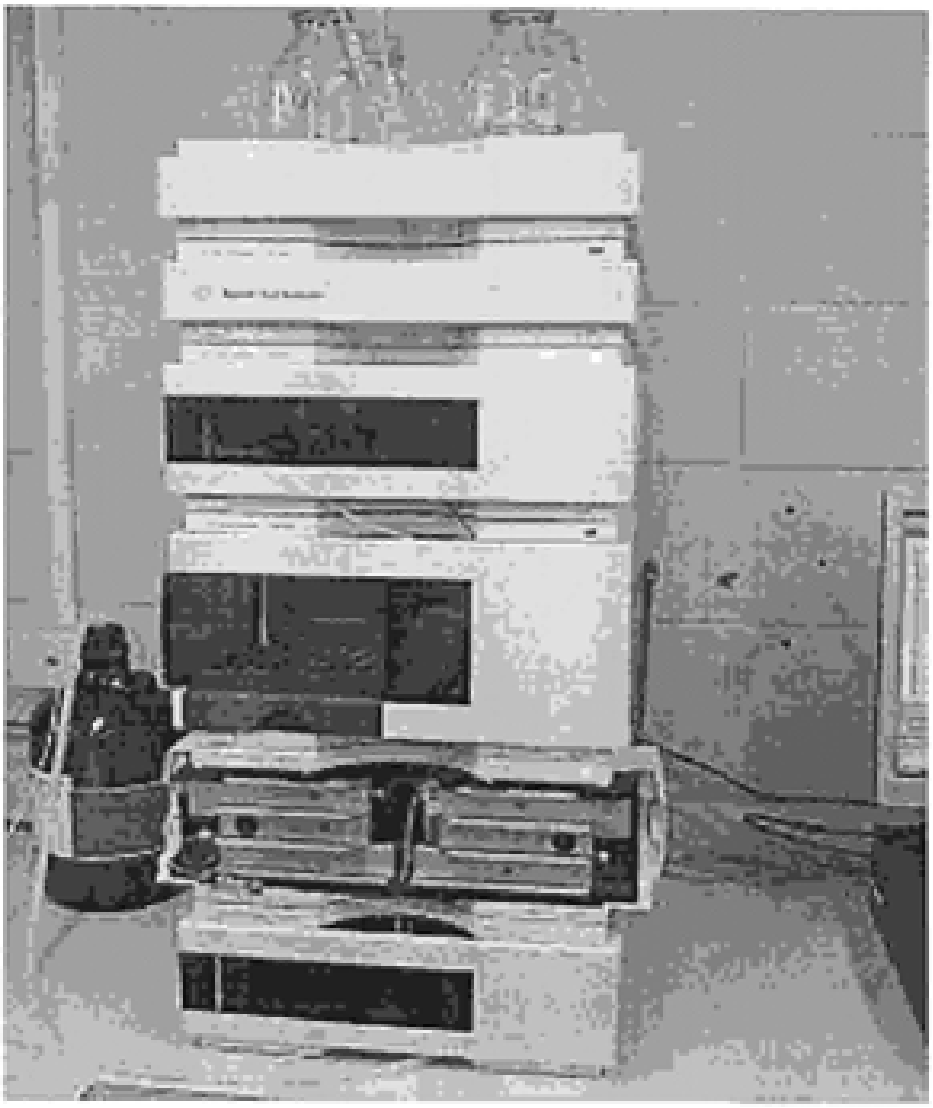
There are two main types of detectors that can be used in HPLC, each of which have several types.

i) Selective Detectors.

- Photo diode array (PDA) detectors
- UV-visible detectors
- Fluorescence detectors

ii) Universal Detectors

- Refractive index detectors



High Performance Liquid Chromatography

Formulation Laboratory

The Formulation Lab, as the name suggests, is the laboratory where in research and development is done to optimize the formula for new formulations. The equipment and instruments are useful for formulating and well as testing the quality and certain other parameters. This lab is further subdivided into three other chambers.

1) Granulation Chamber
2) Compression Chamber
3) Coating Chamber
4) Formulation Area

(A) Tablet Formulation:

The stages involved in tablet formulation are Dispensing, Sieving, Blending, Granulation, Drying, Compression and Coating.

(1) **Dispensing**: Dispensing is done with the help of weighing balance as per the amount specified in the formula.

(2) **Sieving**: Done for maintaining uniform size distribution. Various sieves of varying aperture is use for sieving. Increase in sieve number corresponds to decrease in aperture size.

(3) **Blending**: Done with the help of blender or manually with the help of polybag.

(4) **Granulation**: Done using Rapid Mixer Granulator

The **Granulation Chamber** has instruments useful in preparation, drying and size reduction of granules.

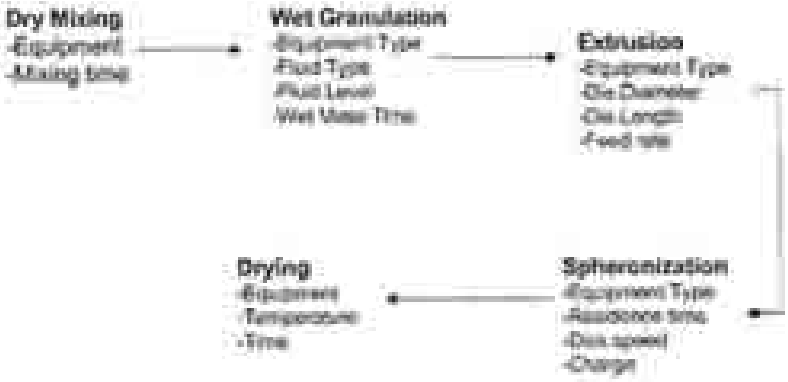
INSTRUMENT	FUNCTION AND PRINCIPLE
Rapid Mixer Granulator (RMG)	Granulation: Designed for powder mixing. The impeller sets the entire mixture in a whirling, rising, tumbling motion. The large lumps occurred during wet mixing are broken up, by the strategically located high speed chopper.
Extrud er	Forms noodle-like extrudes of the feed.
Spheronizer	The extrudes are then converted into spherical, uniform granules
Fluid Bed Dryer	Drying of granules/ powders: Works on the principle of fluidization of the feed material. Hot air flowing through a bed of solid powdered material in the upward direction with a speed more than the setting speed of the particles, causes solid particles to be blown up and get suspended in the air stream.
Electromagnetic Sieve Shaker	Sieving, Particle Size Analysis, Particles Size Reduction: Based on principle of electromagnetic induction. An electromagnetic drive sets a spring mass system in motion and transfers oscillation to the sieve stack. Sample is subjected to a 3D movement and is distributed uniformly across the whole sieve area

Extrusion and Spheronization

Extrusion is the production of rod shaped particles of uniform diameter from the wet mass.

Spheronization is the production of small spheres or spheroids with diameter ranging from 0.5mm to 1mm.

Extrusion/Sphronization
Process Flow Chart and Variables



Advantages of Extrusion and spheronization :

- Optimum shape for coating and for controlled release.
- Elimination of dust.
- Improved hardness and friability.
- Optimum flow and Handling characteristics. Equipments used for Extrusion and Spheronization
- Screw feed extruder.
- Micro Spheronizer.

Evaluation of Powder Blend

Evaluation of the powders after blending is important to check whether or not they have suitable properties, especially flowability and compressibility. The tests for evaluating the powders are described below.

1) Bulk density:

The bulk density of a powder is the ratio of the mass of an untapped powder sample and its volume including the contribution of the inter-particulate void volume. Hence, the bulk density depends on both the density of powder particles and the spatial arrangement of particles in the powder.

Bulk density gives an idea about how much powder can be filled into the die during tableting.

2) Tapped density:

It is obtained by mechanically tapping a graduated measuring cylinder or vessel containing the powder sample.

Tapped density gives an idea about the flowability and the compressibility of the powder.

3) Angle of Repose:

The angle of repose () is the angle formed by the horizontal base of the bench surface and the edge of a cone-like pile of powder. It is a characteristic related to inter- particulate friction or resistance to movement between particles.

Tells us about the flow properties of the powder : A powder that has poor flow will not flow easily from the hopper and may sometimes also cause rat holing and bridging in the hopper.

Flow property	Angle of repose (θ)
Excellent	25-30
Good	31-35
Fair-aid not needed	36-40
Passable-may hang up	41-45
Poor-must agitate, vibrate	46-55
Very poor	56-65
Extremely poor	>66

4) Carr's Compressibility Index:

Carr's compressibility index is an indirect measure of bulk density, size, shape, surface area, moisture content and cohesiveness of materials because all these factors can influence the value of the compressibility index.

(5) Hausner's Ratio

Flow Character	Hausner Ratio	CI (%)
Excellent/very free flow	1.00-1.11	≤10
Good/free flow	1.12-1.18	11-15
Fair	1.19-1.25	16-20
Passable	1.26-1.34	21-25
Poor/cohesive	1.35-1.45	26-31
Very Poor/very cohesive	1.46-1.59	32-37
Very, very poor/ approx. non-flow	>1.60	>38

(6) Compression:

The **Compression Chamber** essentially has a tablet press for tablet compression. It is a multiple station rotary tablet press (10 stations) for small-scale tablet compression. This machine can be used for compressing single layer or multilayer (bi-layer, tri-layer) tablets. For multilayer tablets, it is ensured that the heavier layer is deposited first, so that there is no mixing between the two layers. Additionally, the dust collector also prevents mixing between layers and collects excess powder. The system also provides an operating interface, which helps to specify the parameters of the tablet, such as thickness of each layer.

Parts of Multiple Station Rotary Tablet Press :

- **Hopper**: holds powder you intend to press
- **Die cavity**: it determines the size, type and texture of tablets
- **Feed paddle**: directs material into the die cavity
- **Punches & dies**: they help to compress powder into tablets
- **Cam tracks**: they guide the upper and lower punches.

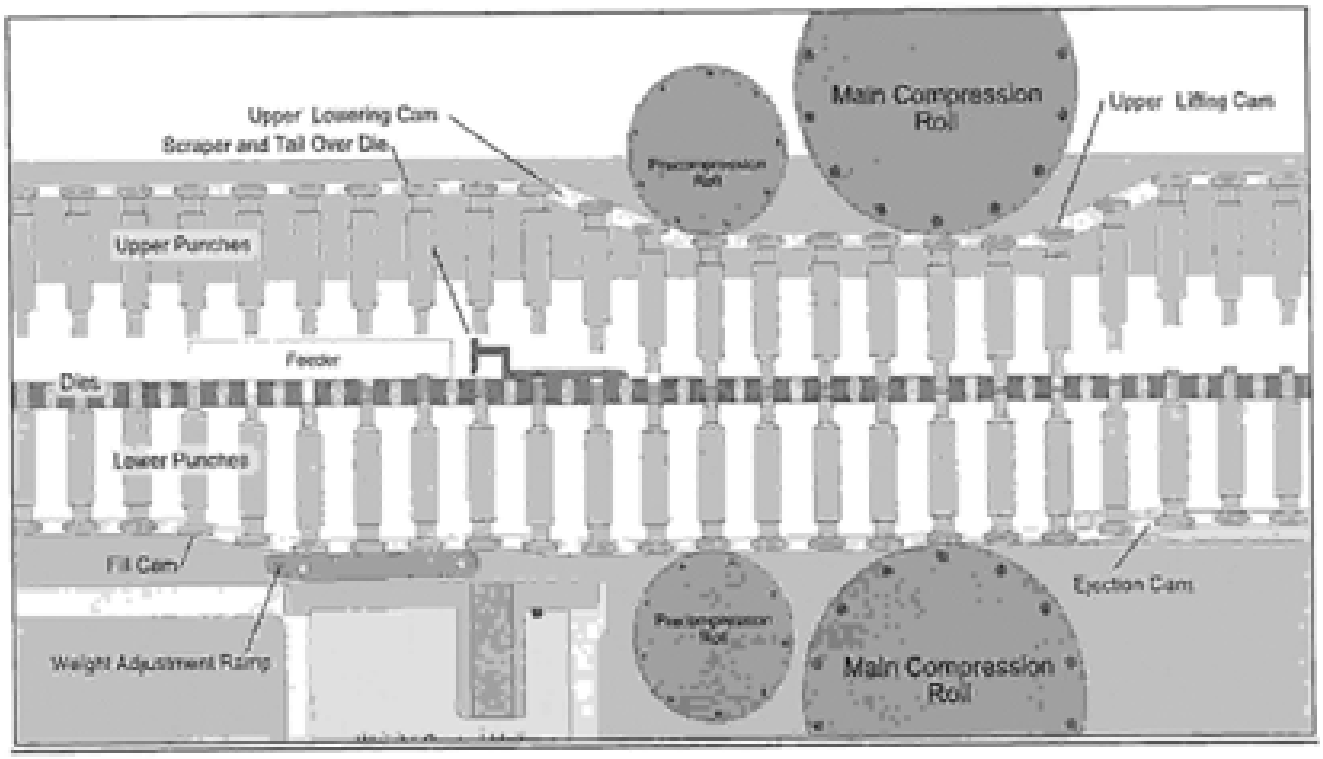
- **Capacity controls**: it ensures proper filling of the die cavity
- **Compressors**: they may include pre-compression and main compression systems. This compresses the powder into a desired tablet.
- **Ejection cam**: this helps to remove tablets from the die cavity
- **Take-off blade**: deflects tablets into discharge chute
- **Control system**: controls and coordinates most functions of the machine

Tablet Tooling

Tablet compression machines are made in keeping in view the type of dies and punches will be used on them, The dies and punches and their setup on compression machine is called tooling, it is classified as B and D mainly.

The B tooling dies and punch can be further have specifications as BB and D tooling can also be dies and punches can be utilised on B tooling machine which is called as DB

Type Of Tooling	Punch Diameter, (in mm)	Die Diameter, (mm)/(inch)	Punch Length (mm)/inch	Max. Tab. Size (mm) Round/Capsule
'B'	19	30.15/ 1.187	133.60	16/19
'D'	25.4	38.1/1.50	133.60	25/25
'BB'	19	24/0.945	133.60	13/14
'DB'	25.4	30.15/1.187	133.60	19/19



Coating :

The **Coating Chamber** consists of an automatic coating pan. At MAPLab, the types of coating that are usually done include enteric coating and film coating. Sugar coating is not done due to multiple steps in the process that makes it a complex procedure.

The auto coater is a three-phase system which employs the use of compressed air. The tablets are placed in a perforated pan in a drum which rotates continuously in an orbital manner. During this motion of tablets, the spray nozzle sprays coating solution automatically in a rational manner to avoid excess or uneven coating. Angled baffles are fitted onto the drum which causes the tablets to be raised and turned from the side of the drum, onto the centre where they can be coated. Hot air is sprayed simultaneously, to allow the drying of coated tablets. The regulation of air allow for maintenance of the drum pressure relative to that of the external

environment, ensuring an isolated process. The temperatures of the inlet and exhaust can be fed onto the system, as can other parameters such as spray rate. The system will ensure then that the coating conforms to the specifications.

Important considerations:

1. Care should be taken that the temperature difference between the inlet and exhaust should not exceed 20°C in order to avoid drying of the coated tablets at a very fast rate, which will lead to orange peel effect (rough appearance) on the tablet surface.

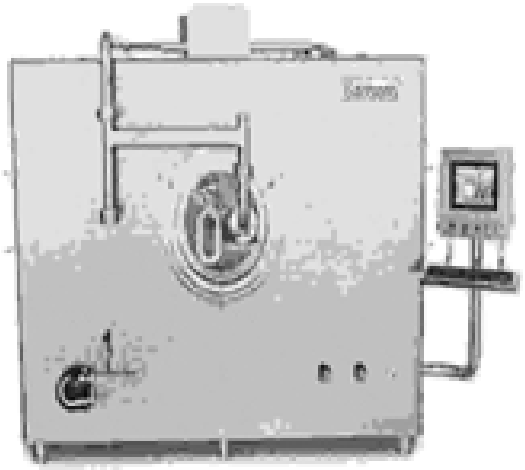
2. Dilution of coating solution is critical and should be optimized such that the coating process does not take very long and the nozzle will not get blocked.

Other instruments present in the Formulation laboratory are given below:

1) **Halogen Moisture Analyzer**
2) **Magnetic Stirrer and Heater**
3) **Quadro Co-mill**
4) **Ultra-Turrax**
5) **Overhead Stirrer**
6) **Weighing Balance**
7) **Automatic Capsule Filling Machine**
8) **Rota Evaporator**
9) **Centrifuge**
Machine
10) **Karl Fischer**
Titrator
11) **Texture**
Analyzer
12) **Ultra-Sonicator**

13) **Blender (multipurpose equipment)**
14) **Disintegration Apparatus**
15) **Friability Tester (LabIndia)**
16) **Tapped Density Tester (LabIndia)**
17) **3D Printer**

Multiple Station tablet press



Ganson Tablet Coater

Halogen moisture analyzer

Magnetic stirrer

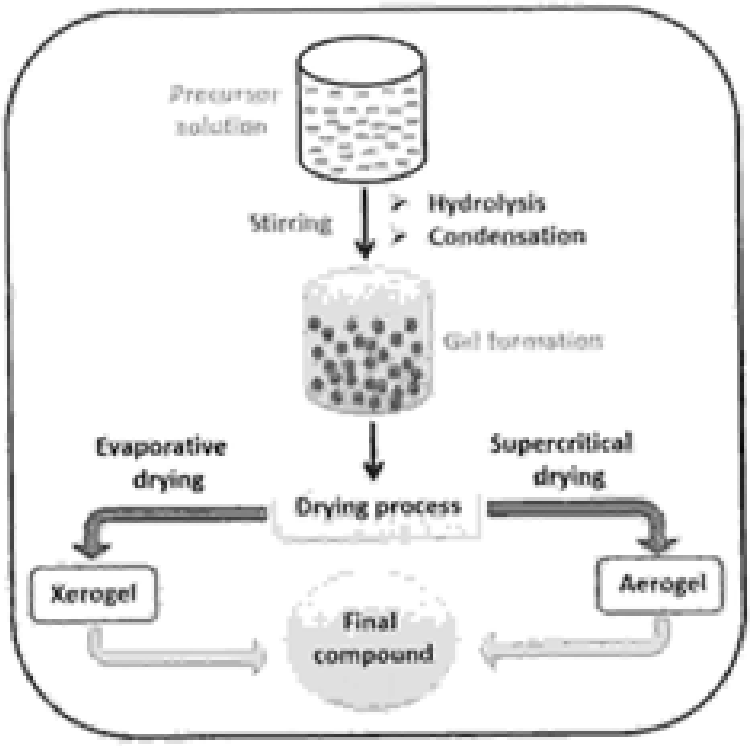
(B) Gel Preparation :

A **gel** is a solid jelly-like soft material that can have properties ranging from soft and weak to hard and tough. Gels are defined as a substantially dilute cross-linked system, which exhibits no flow when in the steady-state. By weight, gels are mostly liquid, yet they behave like solids due to a three- dimensional cross-linked network within the liquid. It is the cross linking within the fluid that gives a gel its structure (hardness) and contributes to the adhesive stick (tack). In this way gels are a dispersion of molecules of a liquid within a solid in which **liquid** particles are **dispersed** in the **solid medium**.

A gel formulation includes a :

Gelling agent such as carbomers, hydroxyethyl cellulose, and hydroxypropyl cellulose are the most widely used—and solubilizers. Depending on the excipients used, a gel can be transparent (most common), translucent, or opaque. Gelling agent can be of natural or synthetic origin.

Viscosity building agent such as glycerine, propylene glycol, etc can be added.



Equipments used for stirring in gel preparation include :

- Magnetic stirrer (Cole parmer) (ultra turrax)
- Mechanical stirrer
  - Overhead stirrer- have cutters
  - Lab stirrer(Remi motor)- have petals

Gels was prepared using various natural hydrocolloids, by mixing them in different proportions, to get gels of varied viscosity and appearance.

Packaging Unit

At the Packaging Unit of P&G MAPLab, prototype packaging is designed and created. For this purpose, there is a specialized **Digital Cutter, 3D printer, Pneumatic Sealer** as well as a machine for **Blister Packing**.

Digital Cutter

The **Digital Cutter** that is used for creating prototype packaging, has two functions:

i) To **cut** the packaging material at designated areas in defined shapesand sizes as specified in the design.

ii)To **fold** the packaging material at designated areas specified in the design.

The required packaging is designed on the computer using a special software. The dimensions are specified, as are the area that need to be cut or folded. It is then fed onto a pen drive. The Cutter contains a provision for fitting the pen drive to its system. Now based on the design, the cutter makes markings accordingly on the sheet of packaging material placed on the surface. Subsequent cuts or fold lines are made at the requisite places. Boxes of different types of paper and cardboard can be created using this equipment. Apart from the digital cutter, prototype package can also be printed three-dimensionally with the help of the 3D Printer. Plastic packaging for various dosage forms is usually 3D printed. Like in digital cuter, 3D printing also requires a preformed design to be fed onto the system. Based on this design, the cartridge present in the printer melts and extrudes plastic along the design and hence creates a solid, three- dimensional package.

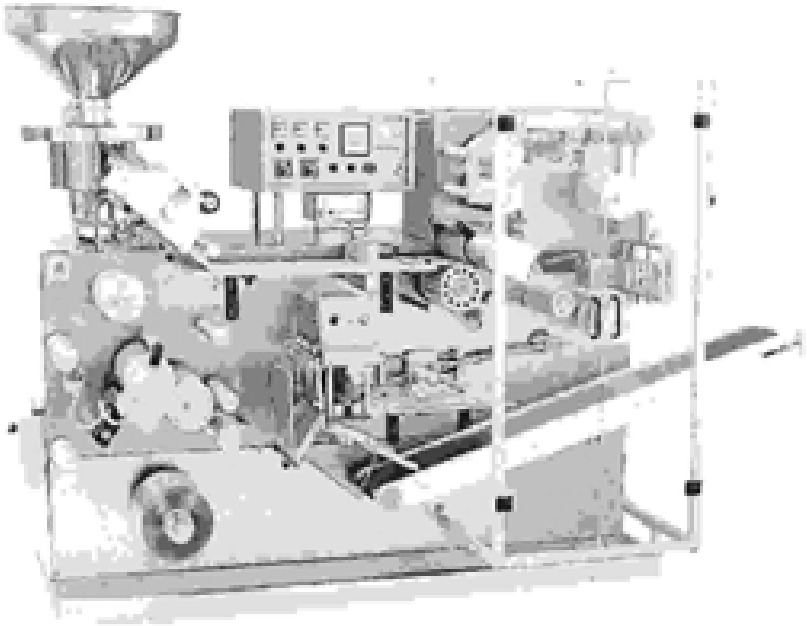
Blister Packing Machine

Blister packing is a type of packaging that is used mainly for solid dosage forms such as tablets and capsules.

The main advantages of unit-dose blister packs over other methods of packing pharmaceutical products are the assurance of product/packaging integrity of each individual dose and the ability to create a compliance pack or calendar pack by printing the days of the week above each dose. They provide barrier properties and to a certain extent, also provide tamper evidence.

At the MAPLab, two types of blister packs are possible to be made using the blister packaging machine: Aluminium-Plastic and Aluminium-

Aluminium. The temperature, pressure and other parameters can be controlled. The machine used is a table-top blister packaging machine that mainly used for stability studies. Depending on the blister packing that is desired, the top roller will accordingly have the appropriate material to form the lidding. The side roller, which is used for the forming film, always has aluminium foil.



3D Printer

Prototype package can also be printed three dimensionally with the help of the 3D Printer. Plastic packaging for various dosage forms is usually 3D printed. Like in digital cutter, 3D printing also requires a preformed design to be fed onto the system. Based on this design, the cartridge present in the printer melts and extrudes plastic along the design and hence creates a solid, three dimensional package.

3D printing or additive manufacturing is a **process of making three dimensional solid objects from a digital file**.

The creation of a 3D printed object is **achieved using additive processes**. In an additive process an object is created by laying down successive layers of material until the object is created. Each of these layers can be seen as a thinly sliced horizontal cross-section of the eventual object.

There are many different branded 3D printing processes that can be grouped into seven categories based upon the way the layers are deposited to create parts.

- Vat photo-polymerization
- Material jetting
- Binder jetting
- Powder bed fusion
- Material extrusion
- Directed energy deposition
- Sheet lamination

Applications in Pharmaceutical Industry

- **Personalized drug dosing**

  A doctor or a pharmacist would be able to use each patient's individual information such as age, race, gender to produce their optimal medication dose, rather than relying on standard set of dosages.

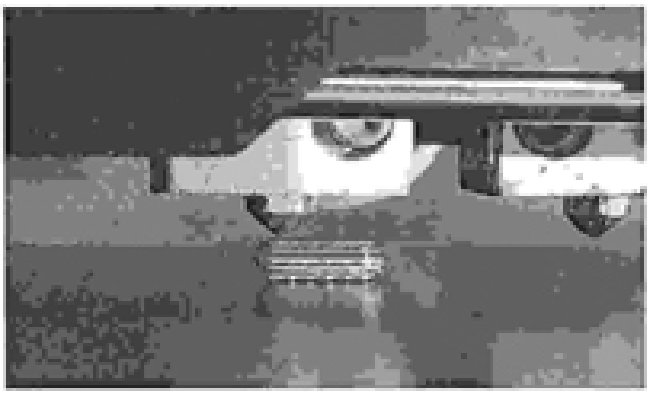
- **Multiple layered Tablet**

  Allows tablet to be printed in complex structured layers which can be used to treat multiple ailments at once. The idea is to give patients one single pill which will treat multiple ailments.

- **Complex drug release profiles**

  Used to print drugs to facilitate targeted and controlled drug release by printing a binder onto a matrix powder bed in layers.

  This creates a barrier between the active ingredients, allowing researchers to study the variations of the release more closely.



Smart Pneumatic Sealer:

It is being used for manufacturing and sealing of pouches which are being used for packaging of various dosage forms.

Stability Testing Chamber

The Stability Testing Room contains stability chambers, each of which has specific temperature and humidity conditions, as specified by the guidelines provided by the **International Council for Harmonization** of Technical Requirements for Pharmaceuticals for Human Use (**ICH Guidelines**).

The ICH Guidelines regarding stability zones and testing conditions are as follows:

ICH Stability Zones

Zone	Type of Climate
Zone I	Temperate zone
Zone II	Mediterranean/subtropical zone
Zone III	Hot dry zone
Zone IV	Hot humid/tropical zone
Zone IVb	ASEAN testing conditions hot/higher humidity

Long Term Testing Conditions

Climatic Zone	Temperature	Humidity	Minimum Duration
Zone I	21°C ± 2°C	45% rH ± 5% rH	12 Months
Zone II	25°C ± 2°C	60% rH ± 5% rH	12 Months
Zone III	30°C ± 2°C	35% rH ± 5% rH	12 Months
Zone IV	30°C ± 2°C	65% rH ± 5% rH	12 Months
Zone IVb	30°C ± 2°C	75% rH ± 5% rH	12 Months
Refrigerated	5°C ± 3°C	No Humidity	12 Months
Frozen	-15°C ± 5°C	No Humidity	12 Months

Accelerated and Intermediate Testing Conditions

Climatic Zone	*Temperature*	*Humidity*	*Minimum Duration*
Accelerated Ambient	*40°C ± 2°C*	*75% rH ± 5% rH*	*6 Months*
Accelerated Refrigerated	*25°C ± 2°C*	*60% rH ± 5% rH*	*6 Months*
Accelerated Frozen	*5°C ± 3°C*	*No Humidity*	*6 Months*
Intermediate	*30°C ± 2°C*	*65% rH ± 5% rH*	*6 Months*

Stores

At the MAPLab facility, there are five different chambers for stability studies. Four of these have the appropriate testing conditions of temperature and relative humidity, while the fifth is a control.

TEMPERATURE	RELATIVE HUMIDITY	DURATION OF STUDY
25° C	60 %	Long-term
30° C	65 %	Intermediate
30° C	75 %	Intermediate
40° C	75 %	Accelerated
5°	-	Control

The **Storage area** is a specialized area that is allocated for the storage of the raw materials required for the formulation i.e. the excipients and the API as recommended by the manufacturers .The storage area is an organized system consisting of various racks placed in a clean environment having controlled temperature and humidity conditions. The raw materials are classified according to the manufacturer and the type of excipient and stored on the shelves on each rack. Alphanumeric codes are assigned to each container of the raw material. These codes are tabulated and a cumulative excel spreadsheet is maintained on the computer, for easy reference of the location of a particular container.

The important aspects considered for storing raw materials are:

- Liquids are stored in the racks separate from the solids.
- Larger and heavier containers or the drums are stored on the lower racks for easy access, whereas lighter and smaller containers are placed on the higher racks.
- Powders are doubly wrapped in polybags, secured by a rubber band and placed in an external container.
- Desiccants are placed in external containers to prevent moisture from attacking the material.

The labeling on the storage container consists of:

- Name of the product.
- Batch No.
- Certificate of Analysis (COA) no.
- Rack No.

The excel sheet consists of the following information:

- Sr. No. And COA No.
- Brand Name.
- Chemical constituents.
- Batch No.
- Supplier and Manufacturer.
- Receiving Date.
- Expiry Date.
- Quantity Received.
- Quantity Left.
- Excipients or API.

Certificate of Analysis (COA)

Every raw material has a certificate of analysis which is the proof of the quality of the material. Before storage of the raw materials it is essential to check the COA.
It is the document issued by the quality assurance that confirms that the regulated product meets its product specification. They commonly contain the actual results obtained from the testing performed as a part of quality control of an individual batch of a product. Every incoming material is verified with its COA, before being stored.
This certificate should contain the name of the material, batch number, release date, expiry date, test performed with limits, numerical results, dated signature by an authorized personnel, and the name of the company or a laboratory.

Given below is a COA template.

Template-Certificate of Analysis

(Ref. SOP LAB-030)

CERTIFICATE OF ANALYSIS

Certificate Number		Supplier:	
Product Code		Manufacturer's Batch No	
Product Name		Sydco's Lab. Batch No	
Date of Manufacture		Expiry Date	

The undersigned hereby certifies the following data to be true specification of the obtained results of tes and assays.

Tests	Results	Specifications (BP)
Appearance		Conforms
Identity		Conforms
Carbonates		Less than Ph 8.6
Solubility		Conforms
Ammonium		Less than 20 ppm
Calcium		Less than 100 ppm
Arsenic		Less than 2 ppm
Heavy Metals		Less than 2 ppm
Iron		Less than 20 ppm
Sulphates		Less than 150 ppm
Chlorides		Less than 150 ppm
Appearance of solution		Conforms
Micro Status		Conforms

ANCHROM

ANCHRC

Hi Vidhi Bhatia

You are invited to a Zoom webinar.

Date/Time: Jun 4, 2021 11:30 AM India
Topic: Anchrom Webinar on "HPTLC: Techniques and Pharma Applications" with "VES College of Pharmacy, Mumbai"

Join from a PC, Mac, iPad, iPhone or Android device:
Click here to Join
Note: This link should not be shared with others; it is unique to you.
Password: 997027
Add to Calendar Add to Google Calendar Add to Yahoo Calendar
Description: "Webinar scheduled with "VES College of Pharmacy, Mumbai"

NOTE:- PLEASE READ THE BELOW INSTRUCTIONS CAREFULLY BEFORE PROCEEDING WITH THE REGISTRATION

1) Please register from your Email id only for the webinar. Registered participants can login only from one device at a time.

2) Please mention your Full Name while registering. This name will be used to prepare the "Attendance Certificate". No changes will be entertained later.

3) "DO NOT" login with Number and Phone Model Names, such entries will not be generated into "Attendance Certificate", even if valid Email ID is provided.

4) Multiple login using same ID will be removed from the webinar. (e.g. same ID of user being used by multiple users)

5) "Attendance Certificates" will be issued only to those who share the full location.

6) "Attendance Certificates" will be provided in a week.

Or One tap mobile:

VES COLLEGE OF PHARMACY

HASHU ADVANI MEMORIAL COMPLEX, BEHIND COLLECTOR COLONY, CHEMBUR (E), MUMBAI 400074

IN-PLANT TRAINING

At VESCOP, We are conducting Industrial Training of the learners (after End semester exam of T.Y.B.Pharm) which offers mutual benefits to both Industry and Students. It helps students to understand the applicability of the academic course. It improves student's professional communication and make them acquainted to industrial practices. Institute has formed Industrial Training Committee to facilitate students placement in various industrial organizations. Committee approaches various industries and ensures placement of all the students in batch. Upon completion of training students submit Detailed Report of training. Certificate issued and feedback form from Employer, respective committee evaluates the reports and awarded students are felicitated on Annual Day.

The file includes certificates and Feedback Forms and Evaluation Sheet of all the students who have undergone in-plant training.

Dear sir,
Hope this email finds you well.

I am writing to you with regards to the Online Inplant Training Program. We are highly honoured to invite you as a guest speaker for this program. Our students and teachers are very keen to attend your session tomorrow.

Time for tomorrow's session would be from 3.15 pm to 4.15 pm.
Kindly let us know if **Webex** would be a suitable meeting platform for tomorrow's session so as to share further details.

Regards
Ms. Bhagyashri S. Parab
Assistant Professor
Department of Pharmaceutics
VES College of Pharmacy

Dear sir,
Kindly note, as Webex meeting app has a limit of 50 min., we have to switch to an alternative meeting platform.

We are going for Google meet platform as it would be convenient for all.

Please find below the link for **Google meet** for today's session:

https://meet.google.com/gbu-dfd-unf

Kindly requesting all to join 5-10 min. in advance.

-Kind Regards
Bhagyashri

Dear Dr Kedar sir,
We are really grateful to you and your organization for extending your supporting hand to our students.
It is a kind of you to always been helpful to students and academicians.
We always work on Carbopol polymers with confidence just because of your support and training.
I am looking forward to listening to you today at 3.15 pm.
I once again thank you whole heartedly for your kind support.
Best Regards
Supriya

TO WHOMSOEVER IT MAY CONCERN

This is to certify that **Ms. Simran S Punjabi of Vivekanand Education Society's College of Pharmacy, Chembur, Mumbai** has successfully completed her Bachelor of Pharmacy Inplant Industrial Training in the Internship Training Schedule on the Written request from the represented college in our Organization under the Guidance of Quality Assurance Manager Mr. Santosh Krishna Dhumal and Quality Control Executive Mrs. Shruti Veer.

Inplant Industrial Training was scheduled from 07 June 2021 till 03 July 2021 at our factory practices in Quality Assurance Department and Quality Control Department.

Ms. Simran S Punjabi has been Sincere and dedicated in her efforts understanding the basic concepts of the pharmaceutical company operations and Standard Operating Procedures. She had taken signature in testing of the Raw Materials, Packing Materials, online batch samples checking for quality standards using the equipment's and testing apparatus under the close supervision of the Quality Control Executive. She had been found positive in taking the necessary instructions and guidance in carrying out the activities and training schedule.

We wish her all success in her future endeavors.

Mr. Santosh Krishna Dhumal,
Quality Assurance Manager,
Eumark Pharmaceuticals Pvt Ltd.

EUMARK PHARMACEUTICALS PVT. LTD. AMBERNATH

ACKNOWLEGDEMENT

I would like to express my deepest appreciation to all those who have helped me complete this report. The skills and knowledge which I have gained throughout my training, I perceive as a very valuable component in my future career development.

I would like to offer my heartiest thanks to Mr.C.Balashankar, General Manager-HR & Admin at Eumark Pharmaceuticals Ltd. I also express my gratitude to Mr. Santosh Krishna Dhumal, Quality Assurance Manager.
Also, expressing my gratitude to the officials and other staff members who rendered their help during the training.

I am grateful to Rashmi Wani, Professor of Pharmaceutics, my mentor who inspired my interest in the aining.

This report could not have been accomplished without her guidance and excellent timely support.

Introduction

Eumark Pharmaceuticals pvt. ltd. is having a total area of about 8700 sq. ft. located In Pollution free Additional Ambarnath M.I.D.C. area only 80 Km. from Mumbai and 60 Km. from J.N.P.T. Mumbai Sea Port. The Unit's neighbouring environment is non-polluting Engineering Industries on all four sides. The Unit is fenced with concrete walls from all sides with adequate Security arrangements. We have Dedicated only Liquid Oral Department. Hence No Chances of Cross Contamination by Activities of other Dosage Forms Tablets,Capsules We have full-fledged Quality Control Department. Our facility is utilized for Manufacture of our own Products developed by us through in-house Formulation R & D and rigorous stability studies. We also Manufacture Products under Loan-License for reputed Export Houses and also for reputed Indian and Multinational Companies.

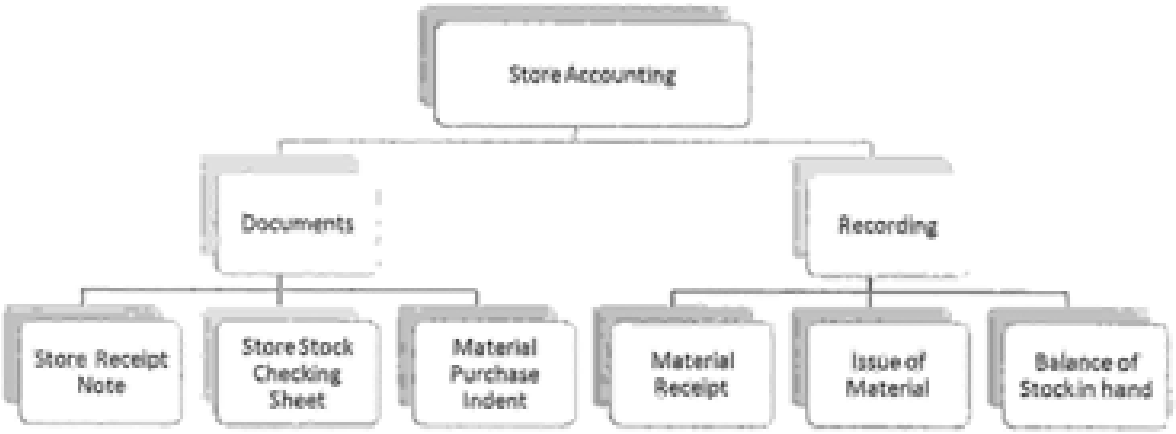
PRODUCTS

Number	Product Name	Composition
1	IRON TONIC WITH VIT B12 AND FOLIC ACID	Each 5 ml contains : (For Therapeutic use) Ferric Ammonium Citrate I.P. ....100.00 mg, Folic Acid I.P. ....1.50 mg, Vitamin B12 I.P. 15.00 mcg, Sorbitol 70% (Non -Crystallising) I.P. ....10.000%W/V, Flavoured Syrupy base ...q.s. Colour : Caramel I.P.
2	IRON TONIC WITH VIT B12 AND FOLIC ACID	Each 5 ml contains : (For Prophylatic use) Ferric Ammonium Citrate I.P. ...80.00 mg, Folic Acid I.P. ...0.166 mg, Vitamin B12 I.P. 1.00 mcg, Flavoured Syrupy Sorbitol base ...q.s., Colour : Caramel I.P.
3	PROTEIN TONIC WITH B-COMPLEX IRON AND MINERALS	Each 5 ml contains : (For Prophylatic use) Protein Hydrolysate 20% (= 15.5% protein) ...0.166 g, Vitamin B6 I.P. ...0.166 mg, Niacinamide I.P. ....3.333 mg, Iron Choline Citrate .... 15.00 mg, Magnesium Chloride I.P. ...(As a Trace Element), Manganese Chloride U.S.P. ...(As a Trace Element), Flavoured Syrupy base ...q.s., Colour : Caramel I.P
4	CALCIUM TONIC WITH VITAMIN B12 AND VITAMIN D3	Each 5 ml (One Teaspoonful) contains : Vitamin D3 (Cholecalciferol) I.P. ...200 IU, Vitamin B12 I.P. ...2.50 mcg, Calcium Phosphate I.P. ...0.25 gm, In a Flavoured Syrup base ... q.s., Colour : Erythrosine
5	IRON TONIC WITH FOLIC ACID , VITAMIN B12 AND ZINC	Each 5 ml contains : Iron (III) Hydroxide Polymaltose Complex eqt. to Elemental iron ...50.00 mg, Folic Acid B.P. ...0.50 mg, Cyanocobalamin (Vit. B12) B.P. ....7.50 mcg, Zinc Sulphate B.P. eqt. to Zinc ....0.50 mg, Flavoured Syrupy base ... q.s.
6	PROTEIN TONIC WITH IRON, CALCIUM, B-COMPLEX AND MINERALS	Each 5 ml contains : Ferric Ammonium Citrate B.P.... 75 mg, Calcium Lactate B.P.... 50 mg, Protein Hydrolysate (20%) (= 15.5% protein)... 100 mg, Cyanocobalamin (Vit. B12) B.P. ....7.50 mcg, Cyanocobalamin B.P. ...2.50 mcg, Folic Acid B.P. ...0.50 mg, Thiamine HCl B.P. ...2.50 mg, Riboflavin B.P. ...2.5 mg, Pyridoxine HCl B.P. ...1.5 mg, Niacinamide B.P. ... 30 mg, Zinc Sulphate B.P. ...35 mg, Selenium (As Sodium Selenite) B.P. ...25 mcg, Copper Sulphate B.P. ...25 mcg, Manganese Sulphate B.P. ...0.25 mg, Flavoured Syrupy base ... q.s., Colour : Approved Colour used

7	MULTIVITAMIN DROPS	Each 0.6 ml contains : (For Paediatric use) Vitamin A (Palmitate) B P. . . .4000 IU, Cholecalciferol (Vitamin D3) B P. . . .400 IU, Thiamine HCl (Vitamin B1) B P. . . .1.00 mg, Riboflavin – 5 – Phosphate Sodium B P eqt. to . Riboflavin (Vitamin B2). . . .0.400 mg, Pyridoxine HCl (Vitamin B6) B P. . . .0.500 mg, Nicotinamide B P. . . .5.000 mg, Ascorbic Acid B P. . . . 50.000 mg, Flavour base . . . q.s.
8	MULTIVITAMIN DROPS WITH IRON AND MINERALS	Each 0.6 ml contains : (For Paediatric use) Vitamin A (Palmitate) B P. . . .5000 IU, Vitamin D3 (Cholecalciferol) B P. . . .400 IU, Thiamine HCl B P. . . .1.50 mg, Riboflavin B P (added as Riboflavin – 5 Phosphate Sodium). . . .1.200 mg, Pyridoxine HCl B P. . . .1.000 mg, Nicotinamide B P. . . .10.000 mg, Zinc Sulphate B P. . . .1.050 mg, Ferrous Gluconate B P. . . .2.000 mg, Ascorbic Acid B P. . . . 50.000 mg, Flavour base . . . q.s.

STORES



- **Procedure:** After receiving the material, the material is unloaded and cleaned by stores person. Material is transferred to designated quarantined area after physical verification. When the material is releasedby QC, QA affixes "APPROVED" label. Material is transferred to respective storage area.
- **Raw Material:** If storage limit is 2°C to 8°C, the material is transferred tocold storage. Rejected material is stored separately.
- **Packing Material:** Printed labels are kept in cupboards. Printed packingmaterial is segregated and stored.
- **Dispensing of Raw Material:** Material requisition sheet is received from production. If the material is under test, QC is informed. Material is transferred to raw material dispensing area. Gowning procedure is followed while entering dispensing area. Stores person verifies all details like, material name, approved label, AR number, batch number, manufacturing and expiry date before dispensing. RLAF is put on 15 mins before dispensing. Cleanliness is checked. Calibration of balances isensured. Different scoops for each material are used to prevent cross contamination. Sequence of material issued is: 1) Excipients 2) Active material 3) Colors & Flavors. "UNDER USE" label is put on last used container and quantity leftover is mentioned. RLAF is switched off and the room is cleaned. Empty containers are transferred to scrap.

MANUFACTURING

- **Entry and Exit Procedure:** Interlock system is present with 3 compartments . Footwear is removed. Ornaments are not carried inside. Hands are cleaned with liquid disinfectant solution (70% IPA). Gowning, slippers and gloves are worn which are kept in SS cupboard (no wooden) While exiting, gowning is removed. Entry to aseptic area is restricted.
- **Sterile Area Cleaning & Disinfection:** It is done to maintain bio-burden under control within acceptable limits. Dust and dirt is removed. Risk of cross contaminations is minimized.
- **Health Personal Cleanliness and Behavior:** Footwear is changed. Hairmust be fully contained. Cut resistant gloves are worn. Clothes are washed and sterilized. Any person suffering from ailment is not allowed in sterile area. Health check-up is done once a year.
- **Tray Washing:** Trays are washed with teepol solution (1% soap solution)and then with purified water.
- **Vial Debaxing:** Shipper of vials/ampoules is dedusted. Vials/ampoulesare loaded.
- **Sterile Area Fumigation:** No activity should be taking place in the sterile area. Status label "AREA UNDER FUMIGATION" is put up. Areas cleaned. Heating, ventilation and air-condition unit (HVAC) is switchedoff. Fumigation is performed. Area is kept undisturbed for 7 hours.
- HVAC is switched on. It is performed on daily basis.

- **Line Clearance:** Ensuring if gowning procedure is followed , status boardis displayed, vessels are cleaned, manufacturing area is cleaned, HVAC system is functional, raw materials are taken to manufacturing area, filling area is cleaned, carbonator machine is cleaned, packing area is cleaned.
- **Cleaning of LAF Prefilters:** Done monthly
- **Manufacturing Area Cleaning:** Movable parts are dismantled. Immovable installations are cleaned in place. Clean and dried parts are assembled. Cleaned equipment should be used within 72 hours of date ofcleaning. For cleaning accessories, they are transferred to respective cleaning areas. They are washed with potable water and teepol solution. They are rinsed with purified water. Accessories are wrapped and stored.
- **Stirrer Cleaning:** Shaft and propeller of stirrer are dismantled. Shaft, sides and base of propeller are cleaned with potable water and teepol solution at least twice till residue is washed off. It is rinsed with purifiedwater and wiped with IPA. It is re-cleaned if not used within 72 hours.
- **Filling Assembly Dismantling & Cleaning:** Syringe and silicon tubingare removed from machine. Nozzle, valve, piston and silicon tubing ofsyringe are dismantled. Nozzle, valve, piston and silicon tubing are flushed with distilled water. Machine parts are autoclaved at 121°C for 30mins.
- **Vial Washing Machine (make: AMBICA):** Line clearance of the machine is checked, for any broken leftover glass vials, if machine is properly assembled, if water lines are clear, spray nozzles, availability of water. LAF is switched 30 mins before. All motors and conveyors are started. Machine is started and level of water is checked. Vial are loaded on infeed conveyor. If the movement of vials and sprays are found okay, washing is started. 25 vials are sent to QA department for checking of particulate matter. Washing is continued after approval. 1 breakage

MICROBIOLOGY DEPARTMENT

- **Viable Air Monitoring:** Microbial environment conditions are monitoredby settle plate or air sampling method. Media plates are prepared aseptically. For monitoring, the plates are carried to the area to be monitored. Plates are marked with date and location. At the sampling location, the lid of the plate is removed and the plate is placed. After completion of sampling, the plate is covered with the lid. Plates are carried to microbiology laboratory and incubated for 5 days. Number of colonies are counted.
- **Preparation of Media:** Formulated commercially available dehydrated

culture media is used. Direction to use is read, the container is checked for expiry date. Required quantity is weighed and transferred to a clean container. Purified water is added to dissolve it completely. The mediumis boiled if required. The media is tested for pH. The pH is adjusted with

O.IN Hydrochloric acid or O.IN Sodium hydroxide. Media is sterilized inan autoclave. The medium is dispensed in required container. The dehydrated container is not left open for too long. Overheating and repeated heating is avoided.

- **Hot-air Oven:** Material is loaded in the oven. Power is switched on.
- Temperature is adjusted. It is switched off after completion of sterilization. The equipment can cool if the temperature is high. Oven andtrays are cleaned with a lint free cloth dipped in a disinfectant solution.

- Calibration is done every six months..

- **Temperature Monitoring:** Temperature of equipment is monitored twice
- a day. Calibrated thermometer is used. Thermometer is placed in thecenter of the equipment and temperature is recorded after 2 mins.

- **General Safety:** Every individual wear clean laboratory garments in thelaboratory and goggles and face mask while handling chemicals and microbial cultures. LAF bench space is cleaned with a disinfectant. Sources of contamination are kept away. It is not allowed to drink or eatin the laboratory. Accidents are reported. Disinfectant is poured on spillage and is kept in contact for at least 10 mins. No one can walk on spillage. Goggles, gloves and nose mask are worn while cleaning. Spillage is collected in discard bin. The laboratory is vacated if any abnormal smell is detected.
- **Cleaning of Glassware:** Remaining material is disposed off. Stains or pen markings are removed by wiping with acetone and scrubbing it off with scrubber and cleaning with tap water. For cleaning stubborn stains, the glassware is rinsed with dilute nit;ric acid and tap water. The glassware is dipped in 70% IPA for 30 mins. All glassware is rinsed withtap water. Glassware is dried in hot air oven.
- **Disinfection of Laboratory:** Entry lock, general corridor, sterilization area, media preparation area, washing area, incubator roo glassware storage room, change room are cleaned and disinfected twice a day. Lintfree mopping duster is used to remove dust from all surfaces of doors, window glass, wall incubator surfaces, grills, external surfaces of equipment. The floor is swept to remove dust using non-shedding lint- free dry mop. Mopping is done with purified water and dilute disinfectant. Media preparation table is cleaned and sanitized with 70% IPA solution.

QUALITY ASSURANCE

- **Market Complaint:** Product complaints are forwarded to QA department. Complaints received from drug regulatory authorities are evaluated as per directives received from them. Register contains detailsgiven below: Sr. No., Date of receipt, Complaint reference, Complainant,Details of complainant, Nature of complaint, Corrective action, Preventive action, Remarks. Any verbal complaint is formalized and investigated. Investigation is started after logging of complaint. If the complaint is critical, the marketing department is intimated for stoppage of further sale and distribution. The complaint is recorded as either
- Critical, Major or Minor. In case of quality complaint, a complaint sample
- is sent to quality control department for analysis. A reply is prepared based on complete investigation. Recalling of the batch depends on thenature of complaint. Feedback from complainant is taken.
- **Qualification of Vendors:** New vendors should be qualified and
- approved. Purchase department locates new vendors. A New Source Request Form is sent to QAHead for evaluation. There are 3 types of sources: New material from new source, Existing material from new source and New material from Existing source. The samples are analyzedby QC. QA Head recommends audit of supplier premises. Samples of printed packaging materials are submitted to QA department. If a lot doesnot comply to the specificationsthen the vendor shall be disqualified.
- **Master Formula Record(MFR):** Divided into 2 parts: Manufacturing
- part and Packaging part. First page has following details: Name, addressand logo of company, Dosage form, Brand name, Generic name, Productcode, Label name, Product description, Batch size, Pack size, Shelf life, Storage conditions, Drug schedule.
- **Self-inspection unit:** Audit is carried out at two levels: Self-inspectionand lernal ud1t. Audit is carried out by QA Head in all departments. Aud t 1s earned out as per the schedule prepared by QA department. udit lanner is distributed in triplicates. Audit may be conducted before mspect1on of any regulatory body. 7-character number: *AAXXNY*, AA:
- type o audit (SI: Self inspection, IA: Internal audit), XX: serial numberof audit, YY: Year of audit. Classification: Critical, Major, Minor and Good Practice.
- **Training Program:** Every employee is trained on area of operation priorto start the work. Training calendar is prepared. Concerned department head confmns the date of training to QA Head. Training records are
- submitted to QA Department. 2 categories: Internal training and Externaltraining.
- **Line Clearance:** Equipment and area is cleaned. "CLEANED" label is affixed on cleaned equipment. Area status board is filled. Checkpoints areverified. Temperture, relative humidity and differential pressure must be within limits. If all points are satisfactory "CLAENED" label is signed. Absence of batch documents, labels, materials, powde,r liquid or any
- remnants of previous products or batch and traces of water surroundingthe equipment is ensured. If it complies " " is marked, if not "x" is
- marked. Proofs are verified by IPQA and it gives fmal line clearance to start the batch only after getting result from quality control department. Area status board includes clean status of floor, ceiling, walls, light fixtures, dustbins and surrounding areas. Overprinting stereos of previousbatch or product are destroyed.
- **Medical Check-up:** All employees are examined by qualified physician.
- A person undergoes medical check-up prior to employment. Check-up includes eye examination, color blindness, tuberculosis, skin and other communicable contagious diseases. If found unfit, the person -is not recruited. Medical check-up is done once in a year. In case a person is found affected by a contagious disease, that person is not allowed to workand is advised for further treatment.
- **Validation of Autoclave:** Done twice a year.
- **Deviation Control:** Anything which works against a written procedure like Standard Operating Procedure, Standard Test Procedure, BMR, etc. Iscalled a deviation. Critical deviation will have a significant impact on critical attributes of a product like manufacturing instruction are not followed, wrong batch details are printed, SOP not followed. Major deviation may have a significant impact on critical attributes of a product.

- **Documents:** The quality manual contains a statement of company's Quality Policy and Quality Objectives. Master documents are detailed documents for implementation of quality management system covering activities that influence the quality of the product. Records are categorized as: Primary records, Secondary records and Sundry records. All documents are made considering statutory requirements. All documents have a unique document number. Hand written documents arenot considered as master documents. All master copies are kept with QA Department. Every document has sign & date of review. Red colored "MASTER COPY" stamp is used. All data maintained in software is password protected. Back up data is maintained. Changes during review are accessed by QA. Final printout is taken by QA. Pharmacopeias, books, reference guidelines etc. are issued, retrieved and controlled by QA. Issuance records are maintained.
- **Disposal of Expired Finished Goods:** Intimation is given by Stores
- Department for expiry of finished goods. Stocks are transferred to rejected area. Destruction note is prepared. Destruction is carried out inpresence of Stores and QADepartment.
- **Control Sample:** Control sample is collected from each batch of finished
- goods and raw material. The quantity of retention sample for finished goods and raw materials is twice the quantity required for carrying out complete analysis. Entry of control sample collected is made in BMR. The sample is stamped as "CONTROL SAMPLE". Control samples arestored in alphabetical order.
- **Change Control:** Any changes are proposed through "CHANGE CONTROL FORM". It is categorized as Critical, Major or Minor.
- Documents and data are submitted along with the form. Requirements forchange control are evaluated by QA. A unique number is allocated to change control. A new series of change control number starts at the beginning of new calendar year. After receiving comments from relevant departments, the change control is approved or rejected by QA. After approval, a change intimation is sent. Implementation of change control isevaluated by QA personnel.
- **Handling of Spillage:** On spillage, all persons are informed to take care
- and the worker to clean the spillage.
- **Dispatch of Finished Goods:** After completion of packing, an intimationis given by packing department. Under test finished goods are stored in quarantine area. Goods are dispatched as per indent received.
- **Artwork of Packaging Material:** MOH approved packaging development module and pdf files are received from Regulatory AffairsDepartment. Packaging department is responsible for designing the

- **Product Recall:** Any written complainant received is investigated. QA head decides for product recall. Product recall is either Voluntary or Forced. Form is forwarded to QA head for approval. Distribution record is checked. QA Head advises Distribution Head to instruct distributors to stop sale of product. Follow-up is monitored. Necessary arrangements are made to receive recalled product. Recalled stock is destroyed as per destruction procedure. Local drug authority is informed about the recall. Mock recalls are also conducted. Mock recall identifies potential problems. Corrective actions are documented in recall report.
- **Corrective and Preventive Action:** Corrective action is an action taken to rectify a specific deviation. Source document provides corrective and preventive actions. CAPA form is treated as tracking form. CAPA form isissued by QA. QA verifies the implementation and completion of CAPA.
- **Site Master File:** Site master file contains 25 to 30 A4 size papers. Site plan, outline drawing, schematic layouts, pressure segregation are attached. Each page has a header and footer. Site master file is prepared by, reviewed by and approved by QA head. Amendments are made on approval of QA Head. It includes licensed manufacturing activities, short description of site, use of assistance in manufacture and analysis, organization chart, organogram, health requirements of personnel, hygiene requirements, nature of construction, brief description of ventilation system, description of planned preventive maintenance programs, sanitation procedure, preparation, revision and distribution of documents, description of production operations, handling of rejected material and product, quality control system, product recalls, and self- inspection programs.
- **Good Documentation Practices:** All entries are made with blue ball penin clear and legible handwriting. Use of ink pen, gel pen, white ink, blade,eraser and pencils is avoided. Short terms are avoided. Data is recorded
- online too. Correct data is written next to incorrect data along with initials. Overwriting is prohibited. Supplements attached are signed withdate. Empty fields are invalidated by crossing them out. Time entry is written in the form of24:00 hrs.
- **Batch Manufacturing Record:** It is the written document of the batch that is prepared during manufacturing process. It contains step-by-step details of manufacturing process. Every batch has a separate BMR. FrrSt page of BMR has records about the batch. Safety instructions to be followed during manufacturing process are written. Checklist of cleanngof all equipment is prepared. List of raw materials with quantity and AR number is mentioned. Yield of the batch is calculated. List of abbreviations are made.

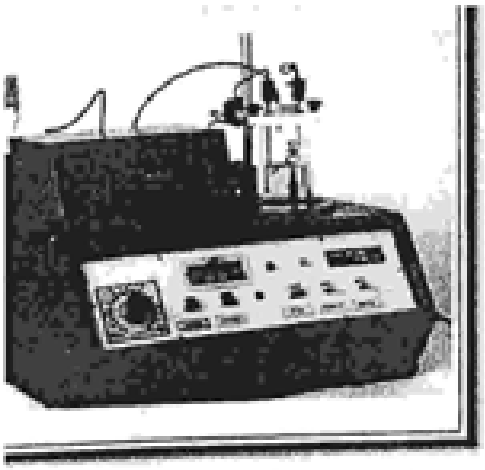
QUALITY CONTROL

- **Analytical Balance :** Weighing pan is placed on balance. AC adapter is connected to the specified power supply and the AC adapter's other terminal is plugged into the socket in the back of the balance. After the main power supply is switched on, the "On/Off' key istouched. A container or butter paper is placed on the weighing pan."Tare" key is pressed. Sample to be weighed is placed up-to the de_sired weight. Stability detector symbol "O" is seen when stability is achieved.To switch off the balance, "On/Off ' key is touched till the display disappears. Balance is protected from vibrations, thermal fluctuations, sunlight, moisture & air currents. Balance is calibrated daily with standard weights.

- **Karl-Fisher Instrument:** For burette calibration, burette outlet is placed in 10ml calibrated measuring cylinder.The obtained volume and displayed volume is recorded. For instrument performance, 100 mg of disodium tartrate is added into titration vessel containing neutralized methanol and tested for water content. % water(W/W) is calculated using the formula,

$$\%water = \frac{\text{Volume of KFR consumed in ml} \times 100 \times \text{Factor}}{\text{Weight of disodium tartrate}}$$

- 150 ml of Karl-Fisher reagent is taken. Glassware is well dried or otherwise the reagent becomes useless due to moisture. KFR is put in thereservoir bottle at the back and stopper is placed immediately. Methanol is added in the moisture beaker to such an extent that the metal wires of the sensor are fully immersed. Dispensing burette is put on top of KFR bottle. "Start" key is pressed. "Smpl" is pressed and sample taken for analysis is added.



Pic. 4 Karl-Fisher Instrument

- **Washing of Glassware:** For cleaningof glassware that are used for ch rmc l analysis special precautions are taken to avoid any chemical res1du m glassware, which may later interfere with chemical analysis.
  Cleanmg of glassware which has contained hazardous material is undertaken by experienced personnel. New glassware is soaked in acid water before washing. Glassware is washed quickly after use. For better results, hot water is used. All parts are thoroughly scrubbed with brush, but abrasion is avoided. Special types of precipitates are removed using nitric acid, aqua regia or fuming sulfuric acid. Labelling of marker pen is removed with the help of IPA or acetone. After cleaning, the glassware is dried in hot air oven. Pipette tip is placed down in a cylinder containing detergent solution. Burettes are washed with detergent water. Burettes are always covered when not in use.

- **Sampling of Water:** Dry conical flask is plugged with cotton. Flask is taken to sampling area. Water is collected through tap for 30 seconds. Flask is rinsed with this water. 500 ml of water sample is collected in theflask. Flask is labelled. Sampling points of purified water in production area are marked with yellow color. Results of the test are recorded. In case any test fails, the maintenance department is informed. Water is sampled every day. Sampling points of raw water in production area are

  marked green.

Ms. Aishwarya Phalke
2/15 A, New Mahim Police colony,
Near S.L Raheja Hospital Marg
Mahim, Mumbai, MH. Pin.: 400 016

Dear Aishwarya,

This has reference to your application and subsequent interview you had with us. We are pleased to appoint you as an **Intern – Pharma** based out of Kalina, Mumbai.

You will be paid **₹ 7,500/- (INR Seven Thousand Five Hundred Only) per month** as a stipend. Following are the terms for your internship assignment:

1. The term will be for 6 (Six) months commencing from January 07, 2021 to June 30, 2021. Continuation of the internship after this period will be discussed and if found mutually satisfactory, may be extended by the company.
2. This internship can be terminated before its expiry by either side by giving one month's notice in writing or one month's fee in lieu thereof.
3. This agreement entered between you and the Company is specifically for rendering assistance as stated above.
4. In your abovementioned role, you will be reporting to Mr. Prajal Pandhare, Asst. Manager – Application Development.
5. It is expressly understood and agreed between us that you shall not be deemed to be an employee of the Company for all legal purposes and/ or any other purpose. The fee payable to you shall not be treated as wage/ remuneration for the purpose of law or any other purpose.
6. It is expressly understood and agreed that you shall not be eligible for, nor entitled to any of the service conditions, benefits, amenities, facilities and the like applicable to the regular employees of the Company.
7. You will work full time for tendering the above-mentioned services at IMCD INDIA PRIVATE LIMITED, Dani Corporate Park, Dani Compound, Vidyanagar Marg, Santacruz (E), Mumbai, MH. Pin.: 400 098.

Dr. (Mrs.) Supriya S. Shidhaye
PRINCIPAL

Value through expertise

8. Your work timings will be from 09:00 a.m. IST to 06:00 p.m. IST which includes 60 minutes of break time which can be consumed in 3 parts in the day. Your workdays will be Monday to Friday of every week.
9. You will be entitled to 2 leaves per month, which you can take with prior written approval from your reporting manager and copy to the Business HR. All unconsumed leave balances will lapse at the end of this period.
10. During the period of agreement, you will not associate yourself with any other company/ organization engaged in an activity which is directly or can be potentially in competition with or detrimental to the interests of IMCD India Private Limited.
11. You obligate yourself to keep secret all business matters that you become aware of while working for us. The confidentiality must be maintained even after cessation/ discontinuation of this agreement for any reason whatsoever.
12. You are required to keep this agreement and its contents confidential at all times, failing which, the management will be constrained to take a suitable decision in the matter.
13. During your association with IMCD India, you must be in full compliance with our Code of Conduct and the service conditions laid out in this letter.

We look forward to a mutually beneficial association with you.

Kindly confirm on mail as a token of your acceptance of the terms of the internship assignment mentioned here.

Yours sincerely
For **IMCD India Private Limited**
