IMPACT ANALYSIS FOR COCURRICULAR ACTIVITIES

Academic Year: 2021-22

Date: 12-03-22

A. Title of the activity: Interaction with Industry expert on the topic of Technology

Transfer: Pharmaceutical Industry Perspective

Speaker: Mr. Jinesh Chauhan, Cipla Ltd.

B. Objectives:

1. Widen the knowledge of students by addressing the gaps in the curriculum.
2. Improving overall personality and self-confidence by participating in Technical activity.
3. Improve communication abilities skills by participating in various technical activities.
4. Develop and acquire teamwork & leadership attributes and decision making ability by participating effectively and ethically in various activities.

C. Activity Outcomes

Activity Outcome	Upon completion of this activity learners would:	Mapped PO	Level of Mapping
A01	Aided in improving basic knowledge associated with the profession of pharmacy	1	3
A02	Develop overall personality and communication	8	3
A03	Strengthened self confidence	6	2
A04	Developed specialised and leadership skills	5	3
A05	Practicing ethics while participating in various activities	7	3

D. Rate the Outcome: This activity helped you to:

Q. No.	Question	Mapped PO	Level of Mapping
1.	Improve my basic knowledge associated with the profession of pharmacy	1	3
2.	Develop overall personality and communication	8	3
3.	Strengthen self confidence	6	2
4.	Develop specialized and leadership skills	5	3
5.	Improve effective and ethical participation in various activities	7	3

Dear faculty and students,

Please note that a very interesting interaction C2C session for M.Pharm students and faculty is being organized:

Name of the Speaker: Mr. Jinesh Chauhan, Sr. Director, Tech Transfer department, Cipla Ltd.

Topic: Technology Transfer: Pharmaceutical Industry Perspective

Date: 12th March 2022

Time: 11.30 am to 12.30pm

Online mode: <https://meet.google.com/ddx-ukmh-jiw?hs=122&authuser=1>

Kindly take full advantage of this opportunity to interact with the highly experienced industry person.

Thanking you,

Best Regards,

Dr. Harsha Kathpalia

Sub: Invitation as a speaker on the topic of Technology Transfer for M.Pharm. students

Dear Sir,

We request you to kindly deliver a guest lecture on the topic of Technology transfer in pharma industry to our FY M.Pharm students. This topic is a part of their curriculum. Your expertise in this area will definitely help the students to get an industry perspective and also help us teachers to update ourselves with the recent ongoing procedures and documentation on this topic.

Hope to get a positive reply from you soon so that we can organize this session before 14th March 2022.

Thanking you,

Yours sincerely,

Harsha

Dear Sir,

On behalf of VES College of Pharmacy, I thank you to spare your time and interacting with us for sharing your valuable experience and knowledge on Tech Transfer.

Kindly fill out this short feedback form and also receive the e-certificate for your contribution as a speaker.

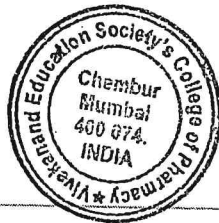

Link for filling feedback form:

Mrs. Sonali Munj, VESCOP

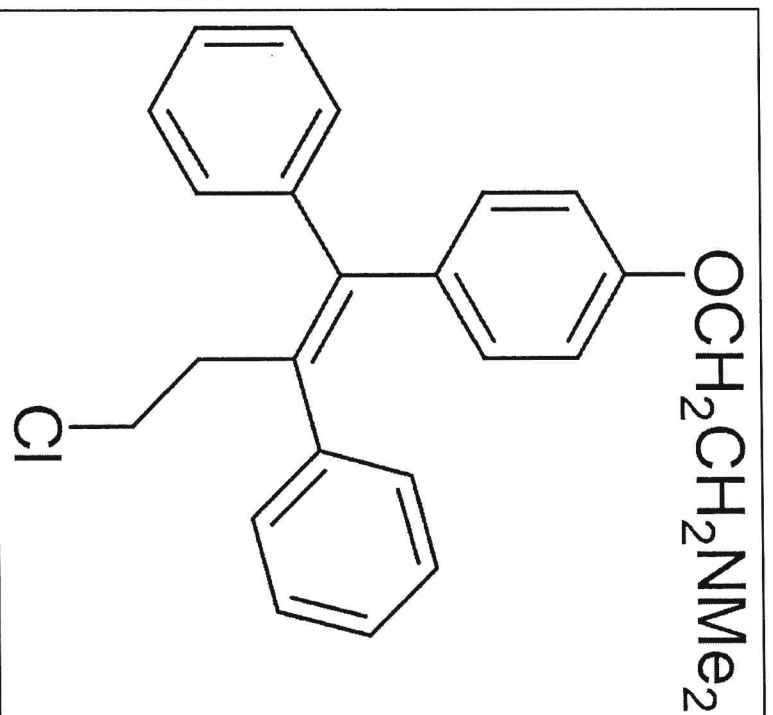

- 1. Why would you want to design a drug that is an enzyme inhibitor.
- (Hint: Write a few names of the drugs and the enzymes that they inhibit.)
- 2. If you want to inhibit the enzyme in a microorganism that is also present in humans, what approaches would you take in your research?
- 3. 5-Fluorouracil inactivates thymidylate synthase and is an antitumor agent. What would be the choice for drug to be used in combination and why?
- 4. 5-Lipoxygenase requires a ferric ion as a cofactor. Show how the following drug acts as an inhibitor of

5-lipoxygenase?

Giving Q & A assignments and tutorials

11th May 22

Biochemistry Assignment

Q. Glycolysis.

→ Glycolysis is defined as the sequence of reactions converting glucose (or glycogen) to pyruvate or lactate, with the production of ATP.

This pathway is often referred to as Embden-Meyerhof pathway (E.M. Pathway)

The glycolysis pathway can be divided into three distinct phases:-

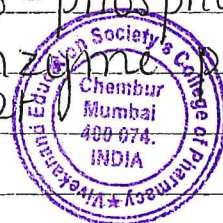

1. Energy investment phase OR priming stage.
2. Splitting phase.
3. Energy generation phase.

1. Energy investment phase.

→ (i) Glucose is phosphorylated to glucose-6-phosphate by hexokinase or glucokinase (both are isoenzymes). This is an irreversible reaction dependent on ATP and Mg^{2+} . The enzyme hexokinase catalyses the phosphorylation of various hexoses (fructose, mannose, etc) and is inhibited by glucose-6-phosphate.

Glucose-6-phosphate is impermeable to the cell membrane. It is a central molecule with a variety of metabolic fates — glycolysis, glycogenesis, gluconeogenesis and pentose phosphate pathway.

(ii) Glucose-6-phosphate undergoes isomerisation to give fructose-6-phosphate in the presence of the enzyme phosphohexose isomerase and Mg^{2+} .

Dr. (Mrs.) Supriya S. Shidhaye
PRINCIPAL
Vivekanand Education Society's
College of Pharmacy
HAMC, Behind Collector Colony,
Chembur, Mumbai - 400 074

(iii) Fructose - 6-phosphate is phosphorylated to fructose 1-6-bisphosphate by phosphofructokinase (PFK). This is an irreversible and a regulatory step in glycolysis.

2. Splitting Phase

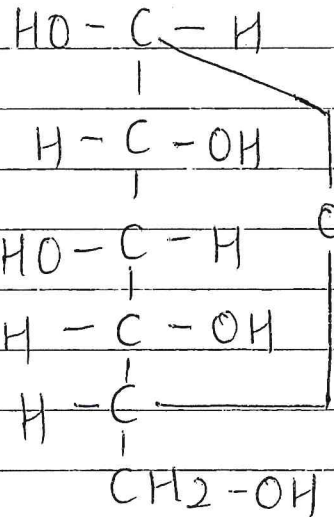

→ (iv) The six carbon fructose 1, 6-bisphosphate is split to two three-carbon compounds, glyceraldehyde 3-phosphate and dihydroxyacetone phosphate by the enzyme aldolase (fructose 1, 6-bisphosphate aldolase)

(v) The enzyme phosphotriose isomerase catalyses the reversible interconversion of glyceraldehyde 3-phosphate and dihydroxyacetone phosphate. Thus, 2 molecules of glyceraldehyde 3-phosphate are obtained from one molecule of glucose.

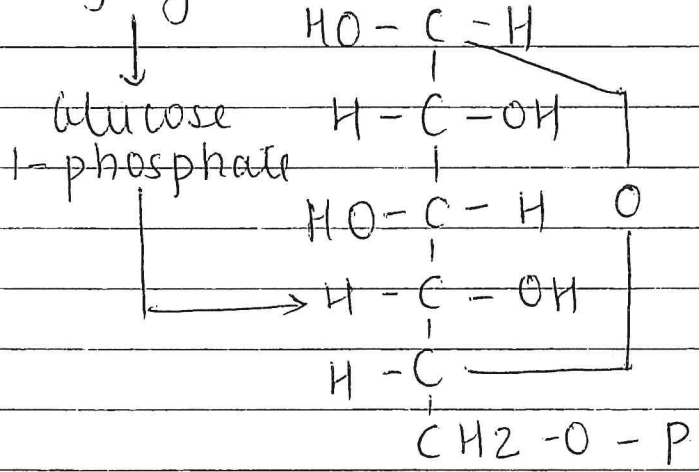

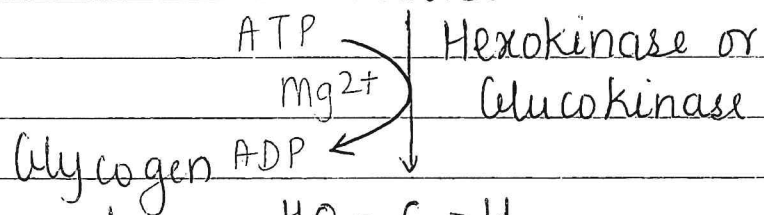

3. Energy generation phase.

→ (vi) Glyceraldehyde 3-phosphate dehydrogenase converts glyceraldehyde 3-phosphate to 1,3-bisphosphoglycerate. This step is important as it is involved in the formation of $\text{NADH} + \text{H}^+$ and a high energy compound 1,3-bisphosphoglycerate. Iodoacetate and arsenate inhibit the enzyme glyceraldehyde 3-phosphate dehydrogenase. In aerobic conditions, the NADH passes through the electron transport chain and 6 ATP ($2 \times 3 \text{ATP}$) are synthesized by oxidative phosphorylation.
