

Title: Best Practice: Quality Enhancement through Robust System for Academic Audit

Objective

Main objective is to have an audit and feedback system in place which aims at bridging the gap between teaching and learning through a proper communication and feedback system.

Context

The purpose is to review the effectiveness of processes and practices and the ultimate goal is to achieve the Program Outcomes in terms of higher studies, and get good employment because of their skills.

Practice

At VES College of Pharmacy we have academic audits and feedback mechanisms as shown in Fig 1. Academic audit promotes organisational and academic rigour. These audits help our faculty to create quality standards and monitoring and enforcement procedures. Feedback from stakeholders helps in auditing our systems to achieve our vision and mission statements.

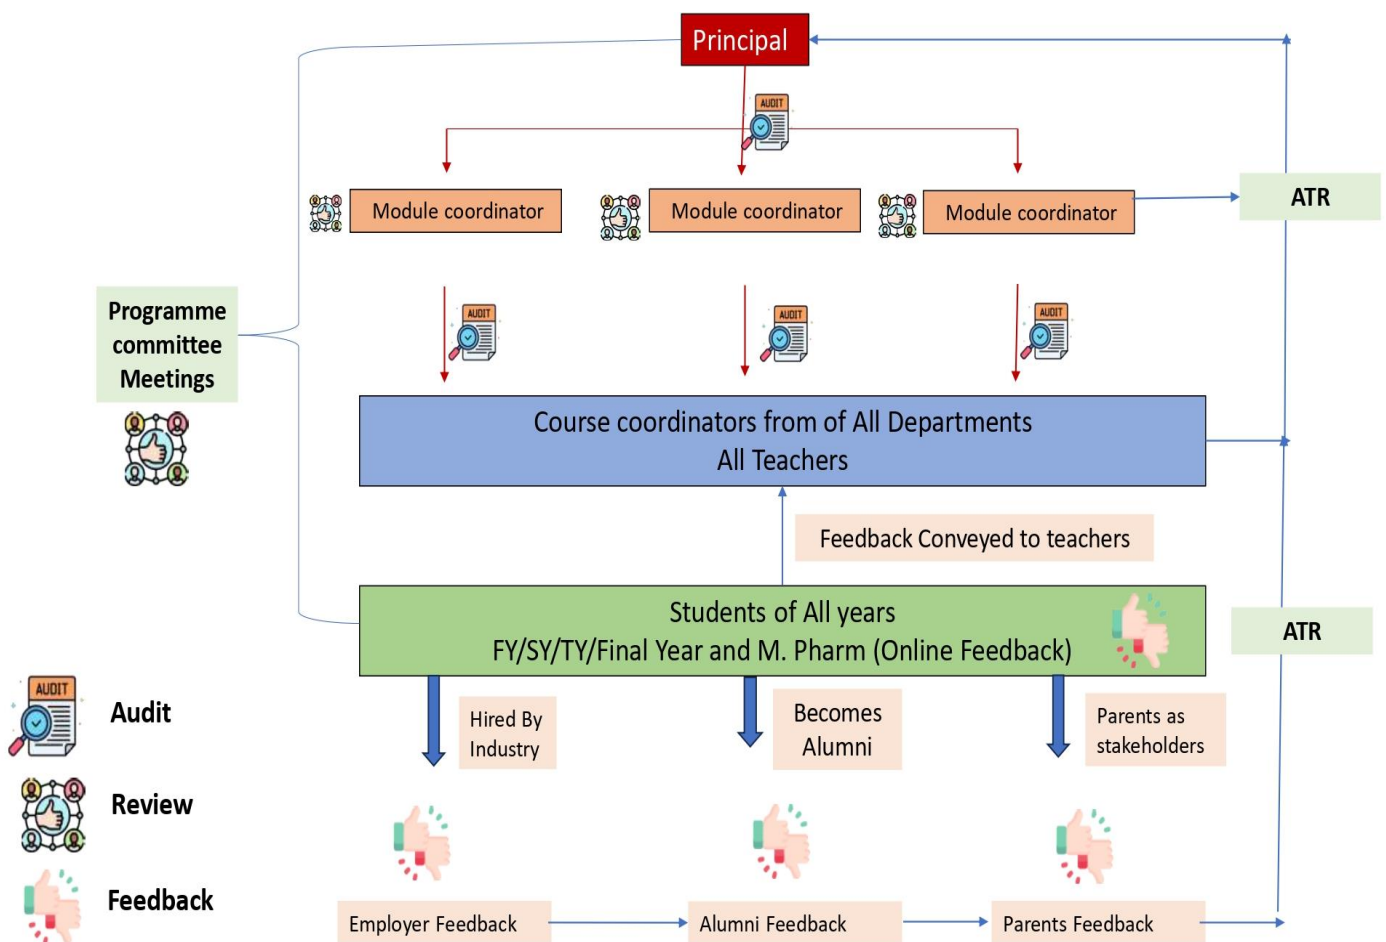

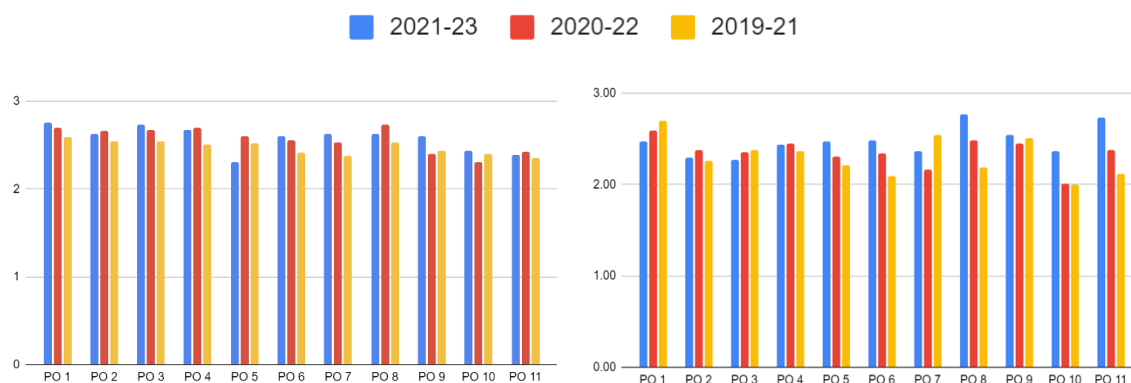

Fig 1: Feedback and Audit System

Evidence of success

1. Consistent PO attainment over the last three years.
2. Average results for the last three years greater than 90%.
3. Alumni have achieved success both in higher studies and good employment.

Fig 2 and Fig 3 are in support of our success.
