### PHO activities

### XVII] JOURNAL CLUB ACTIVITY

It is an initiative that has been undertaken at VESCOP since last four years. This year VESCOP embarks its journey to the Fifth JCA activity which is conducted for undergraduates while they are in third year of bachelors in pharmacy program as per the schedule. These marks are directly correlated to one of the activity based system in NBA thus creating its importance and attainment of the course curriculum and program by review and research aspect.

JCA is an activity whereby the class is divided into groups of four students each and is allowed to choose any topic they want in guidance of the mentor. They are asked to undergo a literature survey by referring to reputed International and Indian journals and present their power point presentation to the class. Evaluators in the form of teachers apart from the guide are allotted and are attending this session for judging their technical knowledge, presentation skills, and team spirit. This is followed by a brainstorming Question Answer session where in refining their communication skills and in depth

knowledge is assessed. The theme is to think, find execute, learn. This activity attempts to shower light on how certain objectives that VESCOP wants to attain and inculcate in its undergraduate students can be achieved via research and review aspect. This activity has helped students on how to conduct a meaningful review of the current research and ways to refer high index factor research papers in reputed journals. In this era when such activities with many novel techniques are known, making a student refer to such reputed journals helps them in figuring out the rationale and intellectual capability. This also boosts their thinking ability and builds interest in the subject of research area. All students submit a summary of the conducted activity after each session. The students, who aspire to be scientists, can carry out a meaningful research work later with an unambiguous aim by performing a proper literature survey from esteemed journals.

**VIGILANCE AWARENESS WEEK** Fighting corruption is not just good governance. It's self-defence. It's patriotism.

Organizing Institute: VES College of Pharmacy

Details of the activity:

Sr. No.	Location	Date	Timing	Activity
1.	VESCOP, Chembur, Mumbai-400074.	October 27 <sup>th</sup> , 2018	2 pm to 4 pm	<ul style="list-style-type: none"><li>• Poster Making.</li><li>• Debate.</li></ul>

Corruption is the use of unethical methods to get some advantage by others. It has become one of the big factors of obstructing the development of the individual and country. On occasion of Vigilance Awareness Week, the Students' Council of VESCOP along with the Union bank of India organized an anti-corruption campaign. This event was hosted by Anushka Rajesh from Final Year. It started off with a pledge against corruption, which was then followed by two activities: A Debate, the topic of which was "Can corruption be fought by enactment of laws alone?" and a Poster Making Competition based on Corruption and Swachh Bharat. IN the audience were students from the First Year, the participants and a few Council Members. The winners for Debate were Atreya Karandikar (TY) who received the First Position and Rushabh Sheregar (LY) who came in Second. Umang Ashar (SY) was awarded First Prize for Poster, Kishan Choudhary (TY) came in second, and Nikeeta Palande (TY) came in Third.

Corruption starts with the person itself, corruption is not only on money side but it is in various fields: corruption in thinking, political and professional, administrative and list goes on. We need to work on every field and the major source of transformation is Education, so start educating the child with ethical and moral values involved.

VES College of Pharmacy in association with Makeintern and E-cell IIT Kharagpur organised a five day workshop on medical devices in the college premises. The workshop received good response and more than 35 students participated in the innovative sessions. Mr Gopi Suresh from Hyderabad was the speaker and expert for all five days. The participants received hands-on training with medical devices. Various other avenues of medical devices were also covered like Detection and Development of basic biochemical assays (protein and glucose tests), discussion on various detection approaches, understanding the phases of medical device development (WHO and FDA guidelines) and real time strategic development of a Diagnostic device. The workshop also had a Conceptual task to create ideas and visualizing the concepts from students with respect to medical devices. At the end of the five day workshop, Mr Gopi Suresh evaluated the participants and the top five participants were selected for a further screening round at the IIT Kharagpur campus which is scheduled to happen shortly. The workshop was a huge success.
