UG PROJECT (Survey based)

FYBPharm Sem II

EVS based survey

The survey-based UG project is an initiative undertaken by VESCOP for the past three years. This UG project is given to students of First Year B.Pharm.

Under this activity, survey questionnaires encompassing various environmental aspects are designed by activity coordinators. The target area to undertake the designed survey is also selected by activity coordinators. Each student of F.Y.B.Pharm has to take the survey by asking enlisted questions to the target population (Minimum 5 people). The survey is analyzed based on the answers given by the target population and a report is generated.

This survey-based activity serves as the basis for one of the methods of literature survey which will help to inculcate research perspective in students. Being a preliminary step towards research-based projects, the activity is suitable for students of F.Y.B.Pharm under which students will learn to communicate the objective and scope of the survey to participants. Students will also learn to achieve the assigned number of target participants and resolve the queries raised by survey participants. At the end of the activity, students will become more aware of concerns regarding environmental issues and will be encouraged to take steps towards resolving the same.

The findings of the survey are directly correlated to one of the weekly mapping POs.

Name and Signature of Activity Coordinator:

1. Mr. Ojaskumar Agrawal | EVS Subject and Activity Incharge | VESCOP
2. Ms. Riya Patra | Students Coordinator | VESCOP
3. Ms. Ekta Sharma | Students Coordinator | VESCOP

REPORT ON UG PROJECT (Survey based)

2020 21

F.Y.B.Pharm (Div A and Div B)

Total Response collected: 401

Following are the conclusions drawn based on the surveys taken by students:

59.6% of people claim that their surrounding is clean.

40.4% of people claim that their surrounding is not so clean.

60.1% of people are satisfied by the garbage disposal system in their surroundings.

39.9% of people are not satisfied with the garbage disposal system in their surroundings.

63.8% of people feel that garbage collection and segregation is frequent in their area.

36.2% of people feel that garbage collection and segregation is not so frequent in their area.

93.5% of people are aware of the diseases spread by unhygienic conditions.

6.5% of people need to be aware of the diseases spread by unhygienic conditions.

6% of people agree that they are not very involved when it comes to keeping their surroundings clean.

94% of people agree that they are involved when it comes to keeping their surroundings clean.

71.7% of people agree that they have a proper drainage system in their area.

IMPACT ANALYSIS FOR UG PROJECT (SURVEY BASED)

Academic Year: 2020-21

Date: 1.6.2021

A. Title of the activity: UG Project (Survey Based)

B. Objective:

To introduce 'Survey' as a method of research which helps to uncover answers to specific questions in an unbiased manner.

C. Activity Outcomes:

	Upon completion of this activity learners would:	Mapped PO	Level of Mapping
A01.	Be able to frame appropriate questionnaire on specific topic	1	3
A02.	Be able to communicate with survey participants in professional manner and Be more aware about the role of pharmacist in society	6	3
		7	2
		8	3
		9	3
		6	2
A03.	Be able to solve the queries of survey participants	3	3
A04.	Be trained more on time management and target completion	2	3

D. Rate the Outcome: This survey based project helped you to

Q. No.	Question	AO mapped
1.	Explain rationale behind inclusion of each of the question in the questionnaire, to the survey participants.	A01
2.	Communicate the objective and scope of the survey to the participants.	A02
3.	Resolve the queries raised by survey participants.	A03
4.	To achieve the assigned number of participants.	A04
5.	Become aware about my duty towards society as a pharmacy professional.	A02

REPORT ON UG PROJECT (Survey based)

Following are the conclusions drawn based on the surveys taken by students:

1. 31.4% people feel that they do not receive adequate water supply
2. 72.7% people are unhappy with the quality of the drinking water they receive
3. Only around 25.1% people are aware about the diseases spread due to unclean water
4. 73.6% individuals are unaware about how stagnant water leads to diseases such as dengue and malaria
5. Only 19.8% people think that they gave the provision for rain water harvesting in their society.

**Academic Year
2017-18**

UG PROJECT (Survey based)

Survey based UG project is an initiative undertaken by VES COP for past two years. This UG project is given to students of First Year B.Pharm.

Under this activity, survey questionnaire encompassing various environmental aspects is designed by activity co-ordinators. Target area to undertake the designed survey is also selected by activity co-ordinators. Each student of F.Y.B.Pharm has to take the survey by asking enlisted questions to the target population (Minimum 10 people). Survey is analysed based on the answers given by target population and a report is generated.

This survey based activity serves as the basis for one of the methods of literature survey which will help to inculcate research perspective in students. Being a preliminary step towards research based project, the activity is suitable for students of F.Y.B.Pharm under which students will learn to communicate the objective and scope of survey to participants. Students will also learn to achieve the assigned number of target participants and resolve the queries raised by survey participants. At the end of the activity, students will become more aware towards concerns regarding environmental issues and will be encouraged to take steps towards resolving the same.

The findings of the survey are directly correlated to one of the weekly mapping POs.

Name and Signature of Activity Co-ordinator:
